Skills

Languages: Python, Go, TypeScript, JavaScript, HTML/CSS, Apex, Java, Lightning Web Components, SQL

Technologies: Salesforce, Sales Cloud, Service Cloud, Git, GitHub Actions, Jira

Leadership: Leading teams, mentoring developers, balancing priorities

Experience

Sr. Software Engineer | Tech Lead @ ATD

Feb 2023 – Present

- Technical lead for Customer Engagement team
- Organized meetings, met with stakeholders, documented technical architecture
- Automated sales processes in Salesforce with Apex, syncing customer data to a Postgres database hosted in GCP
- Collaborated with cross functional teams in a variety of tech stacks
- Automated CI/CD release pipeline using GitHub Actions
- Worked on an onboarding app built in a containerized environment with Python and Angular
- Developed e-commerce solutions with Java and Angular

Software Developer @ Deloitte

July 2019 – Feb 2023

- Led Salesforce development team and oversaw releases for projects contracted by the federal government
- Created front-end components using Salesforce's Lightning framework (JavaScript, HTML, CSS)
- Built a weekly batch job that generated millions of lines of data and resolved long standing performance issues
- Automated data loading tasks using Python REST API wrapper

Software Developer Intern @ Siemens

May 2018 – June 2019

- Automated data migration in AWS S3 buckets
- Maintained a Customer Portal for internal product inventory
- Wrote Apex code and VisualForce pages in Salesforce based on requirements from product owners

Projects

Go-Salesforce | [k-capehart/go-salesforce](https://github.com/k-capehart/go-salesforce)

- A Salesforce REST API wrapper written in Go
- Enables Go developers to integrate with Salesforce and export/import large datasets

SF CLI Plugin | [k-capehart/kc-sf-plugin](https://github.com/k-capehart/kc-sf-plugin)

- A custom plugin written in TypeScript for the Salesforce CLI that automates apex trigger generation
- Includes a number of pre-defined templates using well known design patterns

Open Source Contributions

- Contributed to the official SF CLI, a command line interface built with Node.js
- Custodian of the Lightning Flow Scanner, a collection of tools used to scan Salesforce flows to enforce best practices

Education & Certifications

University of Central Florida

B.S. in Computer Science

Jun 2019

Salesforce Certifications

Platform Developer II, Platform Developer I, Platform App Builder, Administrator
