Themes

Themes

Some useful packages:

- `{ggthemes}`
- `{hrbrthemes}`
- Nice blog post by David Keyes

Fonts

Fonts

The easiest way to use custom fonts is through the {showtext} package.

```r
1  library(showtext) # Make sure to install it first!
```

And importing fonts from Google Fonts.

Colors

Colors

R has its own built-in colors:

`R colors`

However, you can use any color you want through *hex codes.*

`https://www.color-hex.com/`

Patchworking

Patchworking

```
1  library(patchwork) # Make sure to install it first!
```

Saving your plots

Saving your plots

R allows you to save your plots either as an image or as a PDF file.
