AGENDA

DISCOVERY

owners files, unique reviewers and unique approvers

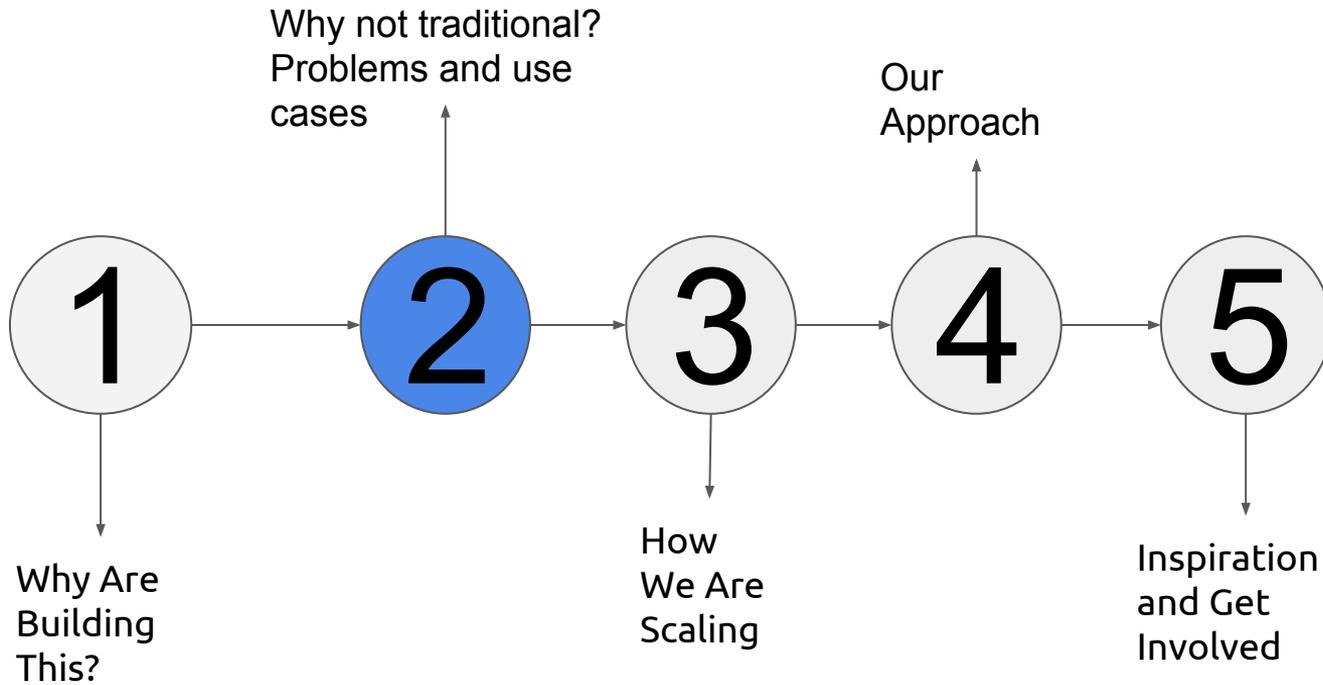

Want a mentor

**Surveyed 120 contributors
Thanks to spiffxp@ for the owners file graph - source, github data*

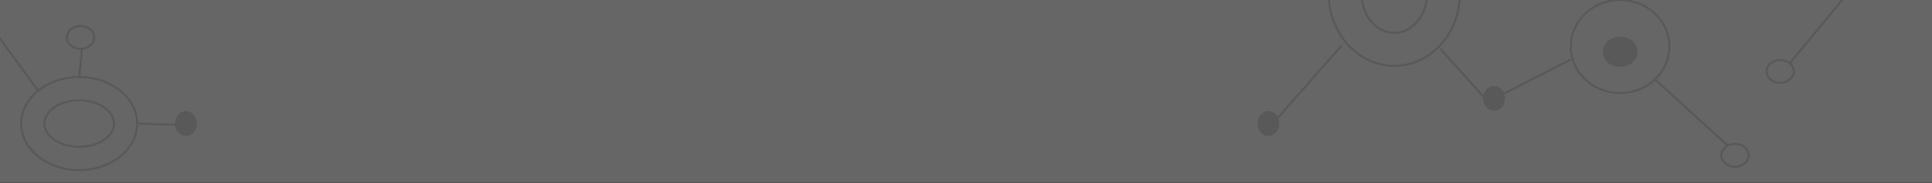

PROBLEMS TO SOLVE

- People who genuinely would like a mentor
- Need better contributor documentation
- Need more structure around moving and growing people in OWNERS files; prevent bottlenecks, burnout, etc.

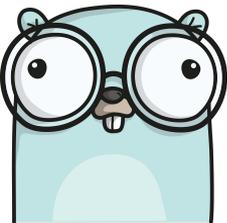

AGENDA

What's traditional mentoring?

Sounds good,
why not use this?

SCALE

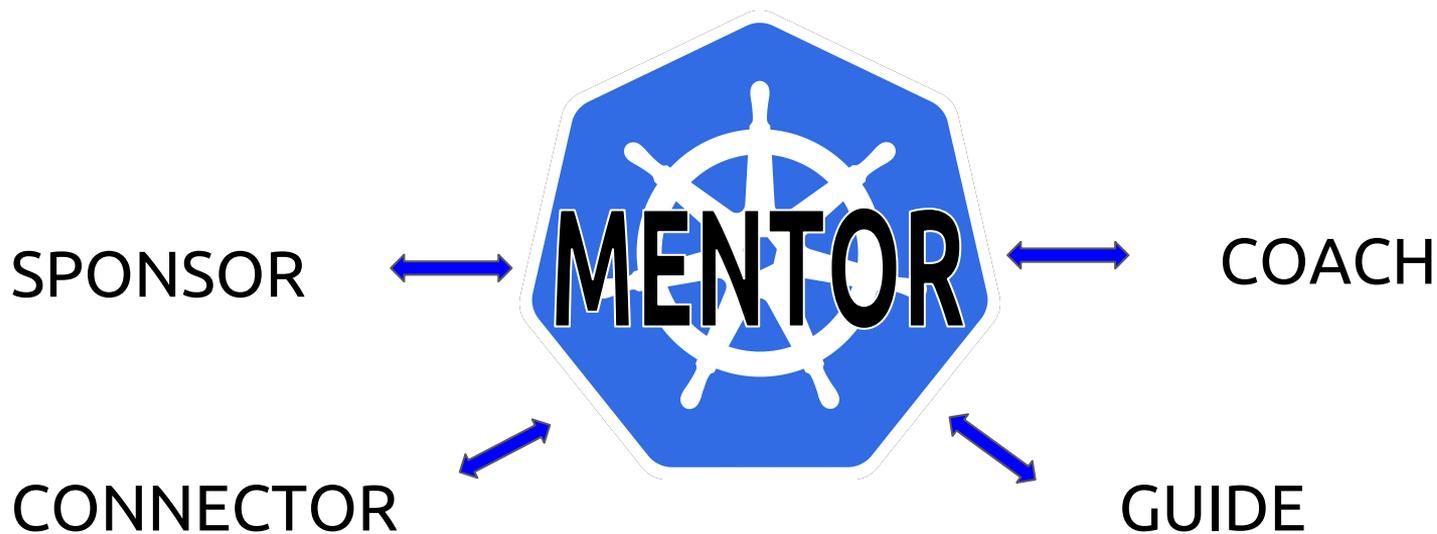

TOXICITY

GOAL SETTING IS HARD

TIME

UNPACKING MENTOR

[Harvard Business Review](#) call this demystifying mentoring

USE CASES

I'm a new or current upstream contributor

& I need have some quick questions that im not finding in docs/need some clarification

& I would like to progress further with my contribution

(OWNERS file growth)

& I would like a 1:1 session

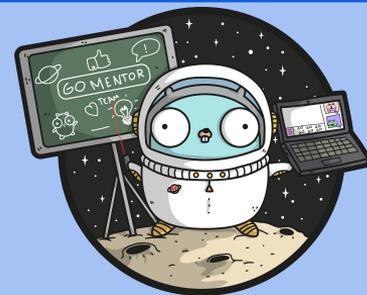

& I'm in a SIG that needs a certain kind of contributor

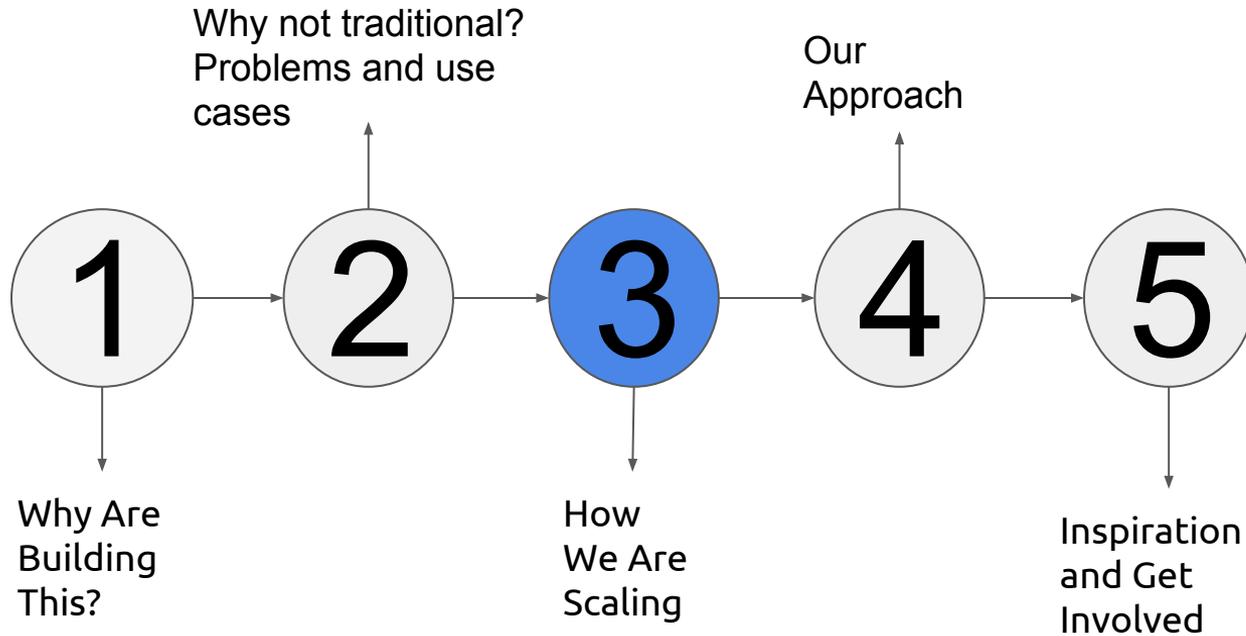

I'm a student and/or underrepresented in OSS

& I would like a mentor!

HOW WE'RE SCALING

-  Self-service
-  Automation
-  Better documentation
-  Predefined goals
-  Semi-structured engagements
-  Peer mentoring

@jonobacon

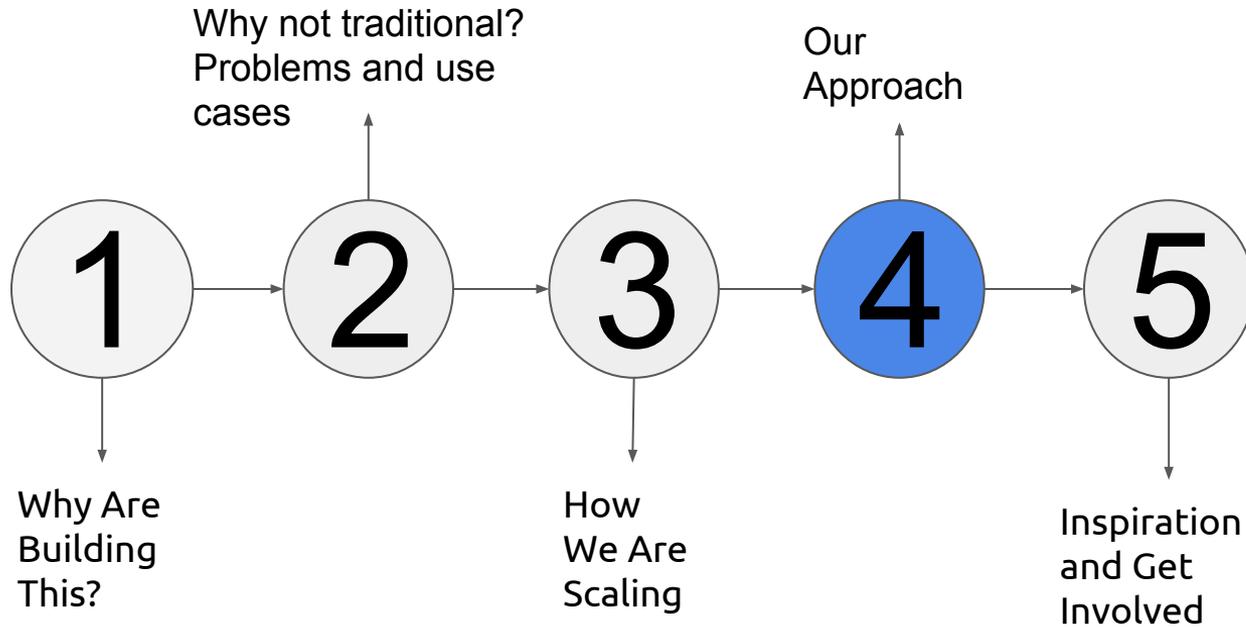

The trick to making communities scale is member-to-member mentoring. Categorize members in groups and set up clear mentoring links. Have clear criteria for what mentoring completion looks like and evolve the support you provide mentors based on mentee feedback.

GROUP MENTORING

Leveraging peer mentoring in a semi-structured self-pace environment

SIG need based

2-3 months

Goal is predetermined - get to the next ladder (member, reviewer, approver)

Successful cohorts in open source:

[Ada Academy](#)

GROUP MENTORING

What did we learn from the test cohort?

- 4:1 mentoring works!
 - 3 graduated to OWNERS files at duration
 - 2 graduated to OWNERS files a few weeks after (they continued)
- >3 time zones should not be in the same cohort
- People have lives and things come up

OUTREACHY & GOOGLE SUMMER OF CODE

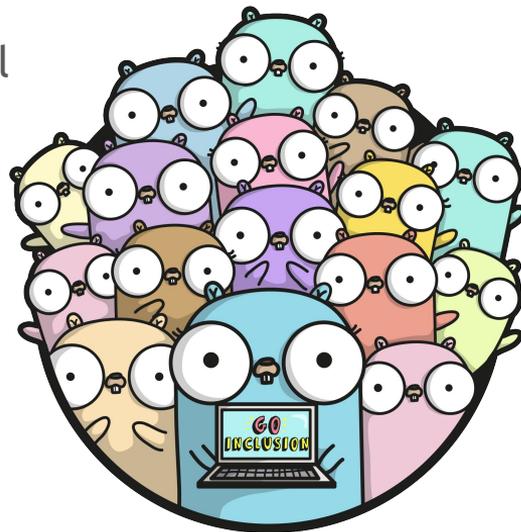

Infrastructure provided; bring your own mentor

Application process, advertising, feedback, payroll

Goals are baked in as they have projects/targets

These alone won't help with scale but work well

with the larger strategy
