

Tales from the Kube

contributions by the community

Brian Grant & Tim Hockin, Google
Clayton Coleman, Red Hat

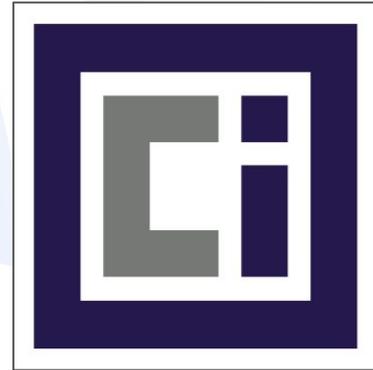

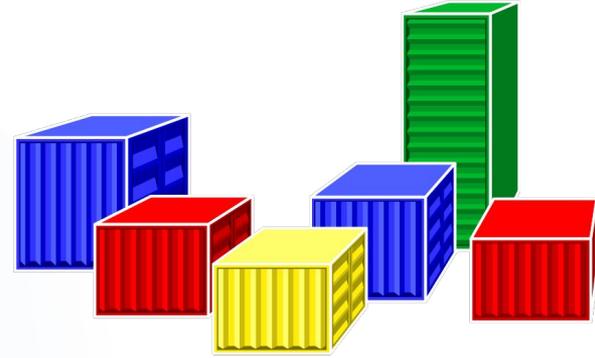

Kubernetes is not the work of a small group of people

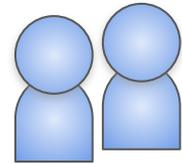

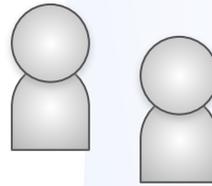

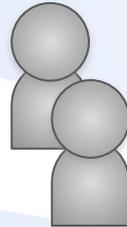

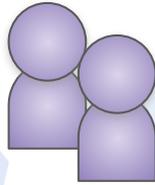

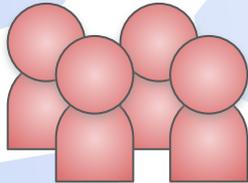

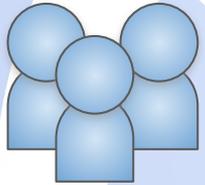

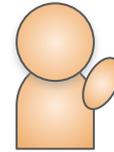

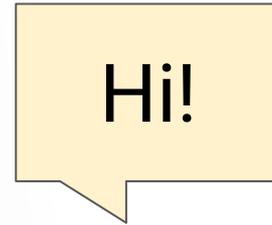

Many, many individuals and companies have made major contributions

The whole is greater than the sum of its parts

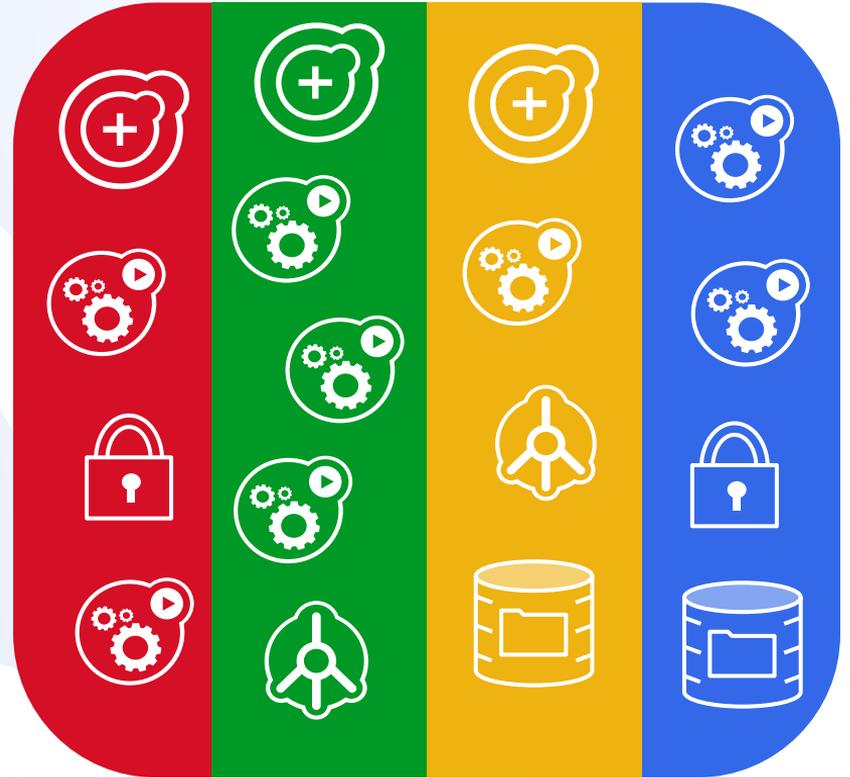

Early Days: Perspectives & Projects

Open Source Meets Enterprise

Multitenancy: Birth of Namespaces

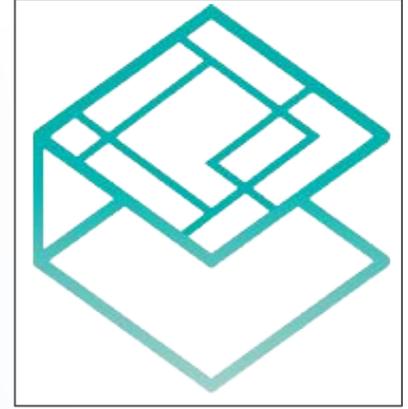

Improving Usability

```
$ kubectl pods list
```

```
$ kubectl get pods
```

Ecosystem: Networking is Hard

Rallying the Community for Scalability

Making Kubernetes Work On More Clouds

Scaling Down: Students and Hobbyists

Kubernetes would not exist today without **all of you**

There is no major Kube success that didn't come from people giving their **heart and soul** to making it happen.

Some things took a lot of effort and time to complete

We hope to be on this stage in a few years time, talking about folks in the audience today and how **you** changed the future
