25th June 2019, Shanghai China

Yifan Zhao, Software Engineer
yifan@improbable.io

If a tree falls in a forest and no one is around to hear it, does it make a sound?

如果一棵树落在森林里，周围没有人听到它，它会发出声音吗？

Alibaba Cloud

Agenda

Single Cluster

Multi-Cluster

Multi-Cloud

Our Mission: **Make Impossible Games Possible**

"Improbable's platform, SpatialOS, is designed to let anyone build massive simulations, running in the cloud: imagine Minecraft with thousands of players in the same space.... Its ultimate goal: to create totally immersive, persistent virtual worlds."

- WIRED, May 2017

Define: Monitoring

“

Collecting, processing, aggregating, and displaying real-time quantitative data about a system, such as query counts and types, error counts and types, processing times, and server lifetimes.

”

    prometheus.io/scheme: http  
    prometheus.io/scrape: "true"
```

Single Cluster

Single Cluster

Kubernetes

- Basis for workload management
- Kubernetes Service Discovery for discovering workloads
- Mature tooling and automation

Prometheus

- Collection of data from workloads
- Data queried directly from Prometheus Scrapers
- Fast becoming industry standard for metric collection

Single Cluster

- Pros
 - Simple
 - Easy to Monitor
- Cons
 - Redundancy
 - Latency

Multi-Cluster

Multi-Cluster - Prometheus

Multi-Cluster - Federation

Thanos Project

- Global query view of Metrics.
- Unlimited retention of Metrics.
- High availability of components, including Prometheus.
- Downsampling of Metrics.

Multi-Cluster - Thanos Sidecar

Remove Graph

Multi-Cluster

Multi-Cluster

Kubernetes

- Consistent approach in all clusters
- Kubernetes Service Discovery for discovering workloads
- Mature tooling and automation

Prometheus

- Collection of data from workloads
- Federation can be problematic

Thanos

- Global View, Retention, HA, Downsampling
- Pulls Metrics from Object Storage or Thanos Sidecar
- Builds on existing Prometheus infrastructure

Multi-Cluster

- Pros

- Reduced Latency
- High Availability
 - Cluster Level
 - Workload level
- Global Query
- Long Term Metrics

- Cons

- Observability is harder
- Increased Complexity
- Automation?
- Tooling?

No plan survives first contact with the enemy.

没有计划在与敌人的第一次接触中幸存。

envoy

Multi-Cloud - Envoy

Multi-Cloud - Envoy

Multi-Cloud - Persistence

Multi-Cloud - Querying

Multi-Cloud - Thanos Receive

Multi-Cloud

Kubernetes

- Consistent approach in all clouds & clusters
- Kubernetes Service Discovery for discovering workloads

Prometheus

- Collection of metrics from workloads
- TSDB Storage format

Thanos

- Global View, Retention, HA, Downsampling
- Flexible StoreAPI allows for different usage scenarios

Envoy

- Edge Proxy for same approach cross-cluster and cross-cloud communication

Multi-Cloud

- Pros

- Reduced Latency
- High Availability
 - Cluster Level
 - Workload level
- Global Query
- Long Term Metrics

- Cons

- Observability is harder
- Increased Complexity
- Automation??
- Tooling??
