Engineer, PlanetScale

## What is Vitess?

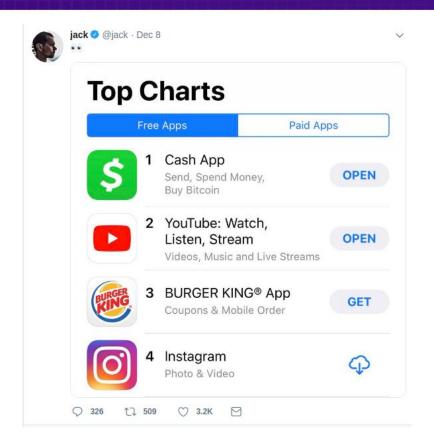

- Sharding middleware for MySQL
- Massively scalable
- HA Five-9's Availability
- Cloud-native

Vitess stats Marquee adopters Started 2010 100+ contributors 8,000 + stars800+ Slack members 16,000 + commits1000+ forks

# Adoption

# Key adopters

3000+ Databases, 18000+ Tablets

# slack

25% Migrated to Vitess

Square

Cash App fully runs on Vitess

All of advertising campaign management

# The Community

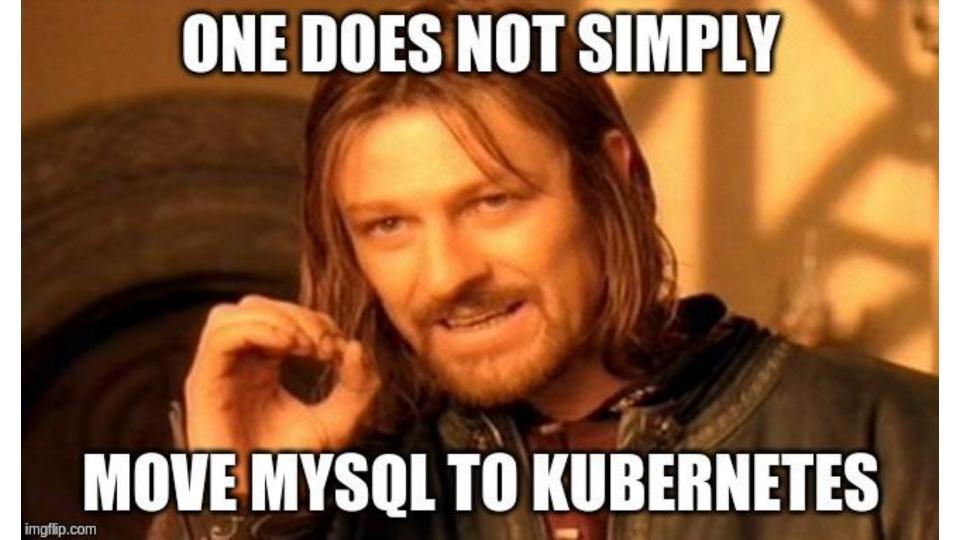

## Stateful Workloads on Kubernetes?

# Vitess: History

- Started 2010
- Solved YouTube's scaling problems
- Designed for Borg → Designed for K8s

## Production Workloads

Oldest, since 2016

Hundreds of keyspaces

3000+ Databases, 18000+ Tablets 64-shards (on largest DB)

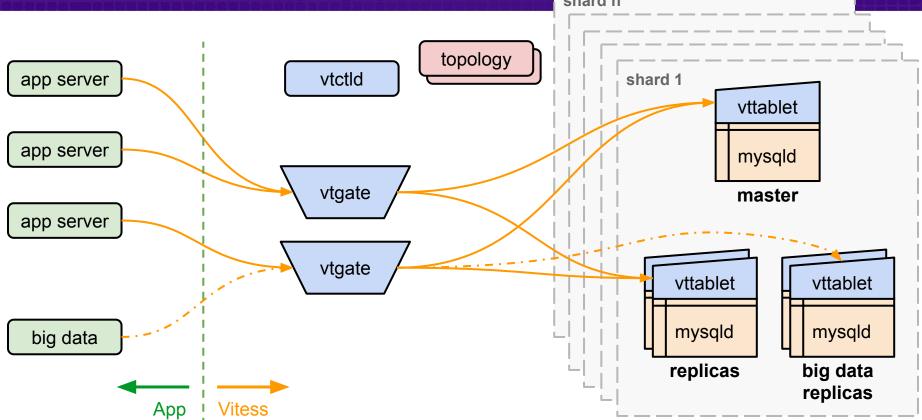

Migrates between clouds MySQL 8.0

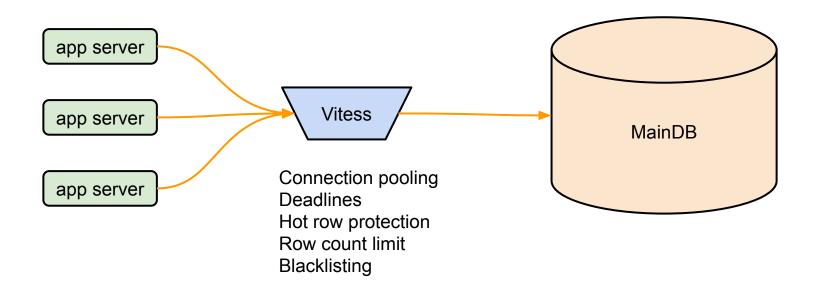

## Small Workloads

## Small Workloads

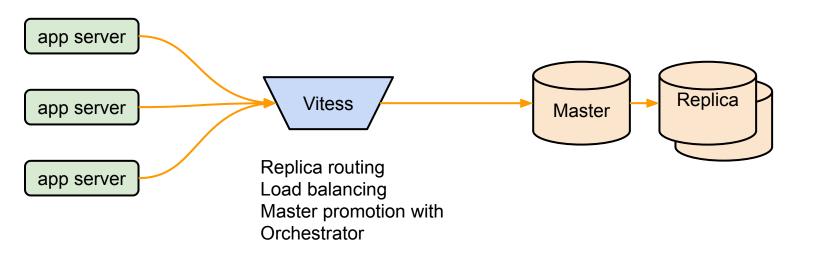

#### **Scalability Guardrails**

- Connection pooling
- Deadlines
- Hot row protection
- Row count limits
- Blacklisting

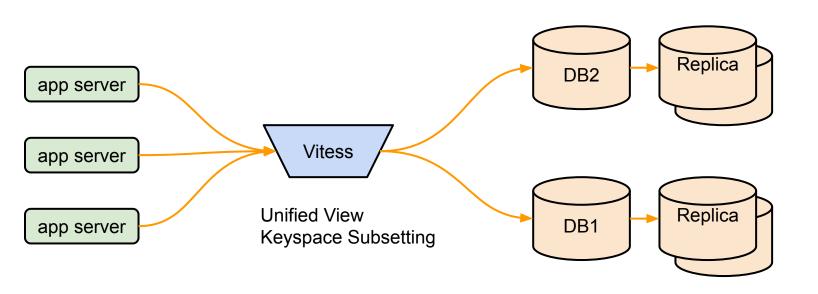

# Growing Workloads

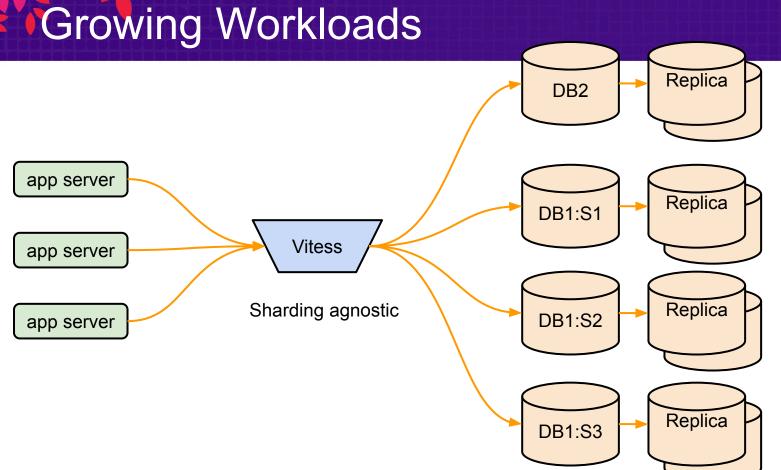

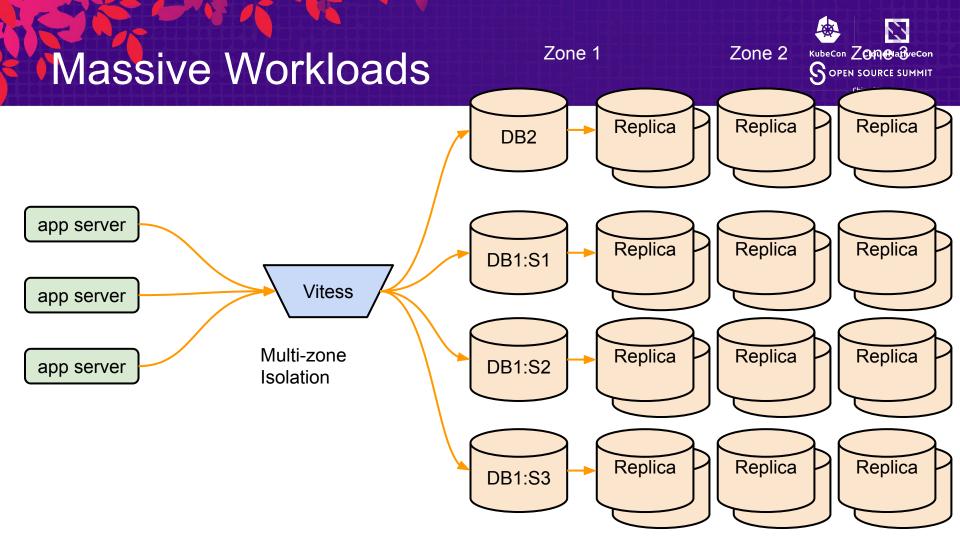

# Growing Workloads

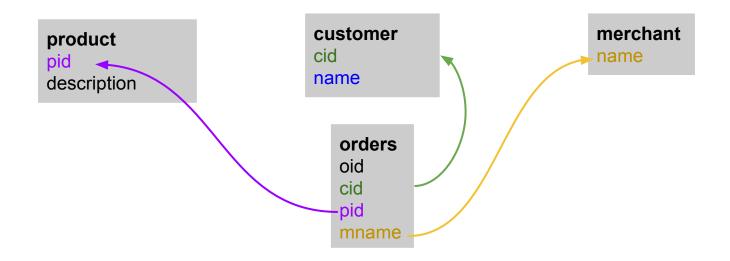

# Demo

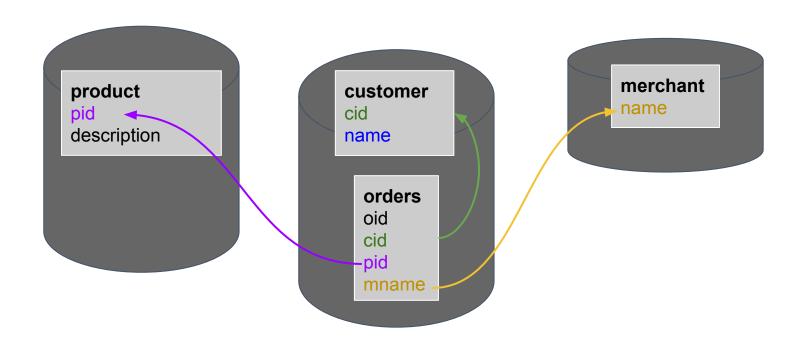

# Marketplace schema

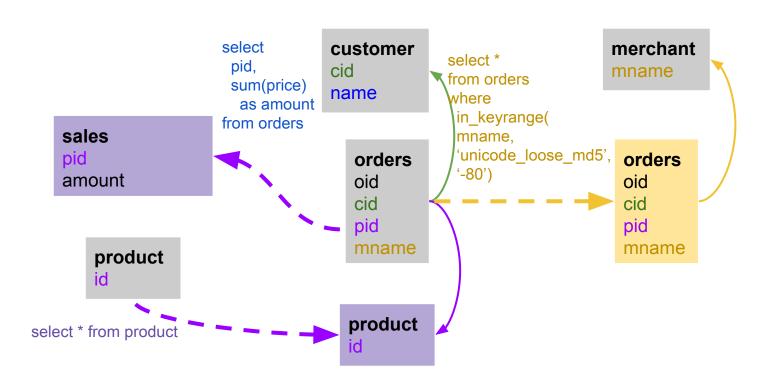

# Sharded

# VReplication

## Use cases

- Materialized Views
- Real-time Rollups
- Resharding
- Backfilling of lookup vindexes
- Schema deployment
- Data migration
- Change notification

## What's next?

- Sign into <u>slack</u> channel at <u>vitess.io</u>
- Join WeChat group: (FIXME link/qr code)
- Bring up a cluster on laptop or kubernetes
