Istio on Knative Lessons Learned

How Istio is Fit for Serverless Platform

Ying Chun Guo & Iris Ding, IBM China

About us

KubeCon

CloudNativeCon

Europe 2019

Ying Chun Guo "Daisy" @daisy-ycguo
Interested in Serverless
Contribute to Knative, Apache OpenWhisk

Shao Jun Ding "Iris" @irisdingbj
Interested in Service Mesh
Contribute to Istio

Agenda

KubeCon

CloudNativeCon

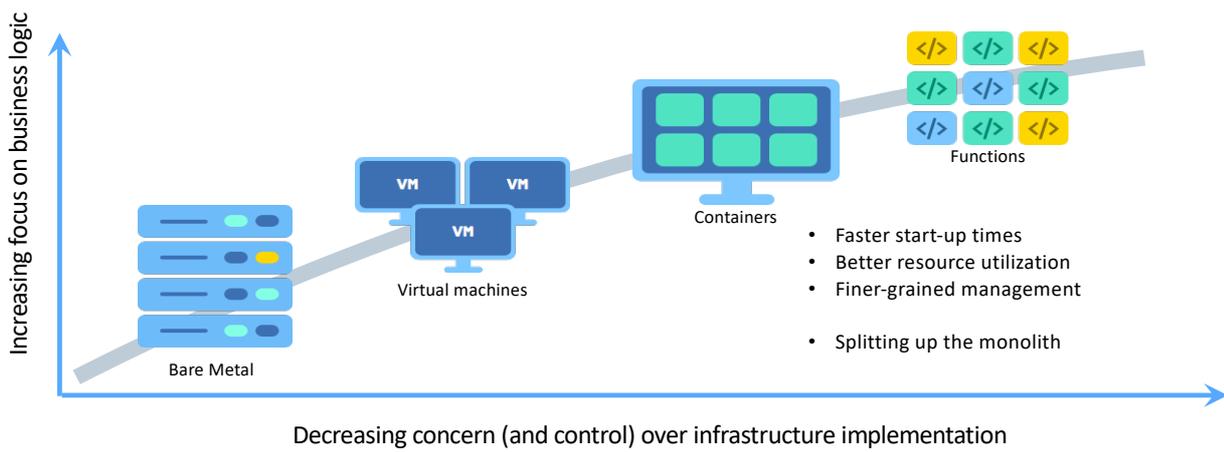

Europe 2019

- Serverless and Knative
- Service Mesh and Istio
- Benefits of Istio on Knative
- Costs of Istio on Knative
- Summary

Serverless

CloudNativeCon
Europe 2019

Properties of Serverless

KubeCon

CloudNativeCon

Europe 2019

- Stateless
- Event Driven
- Auto-scaled / Scale-to-zero
- Short Lived
- **Reduced Cost**
- **Faster Time to Market**

To make your own Serverless platform.....

KubeCon

CloudNativeCon

Europe 2019

Open Source Serverless Project

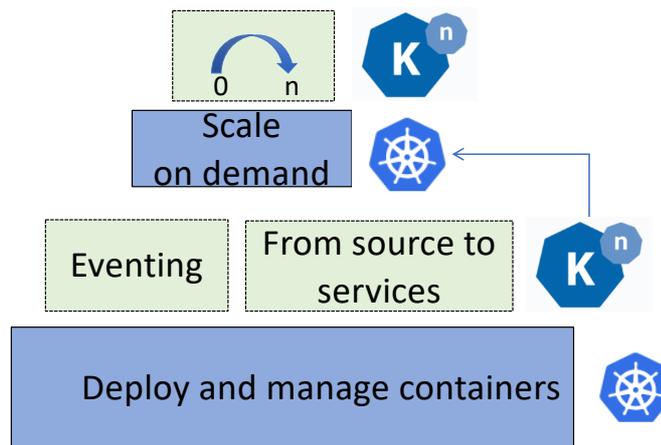

Kubernetes

Knative – Bring Serverless to Kubernetes

- Knative Building
- Knative Serving
- Knative Eventing

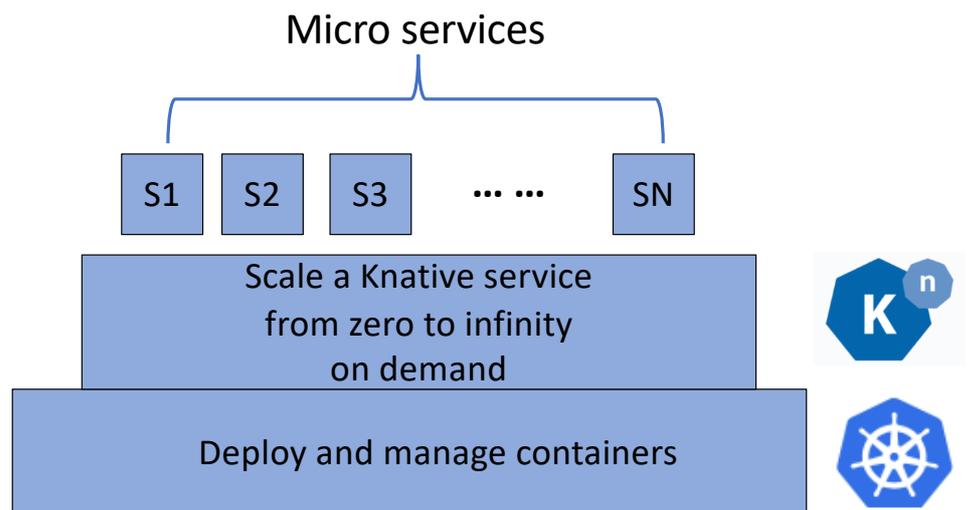

Micro services on Knative

Users want to ...

- Locate a service by a host name and path
- Control the traffics
- Secure services access
- Logging, monitoring, and tracing
-

Service Mesh

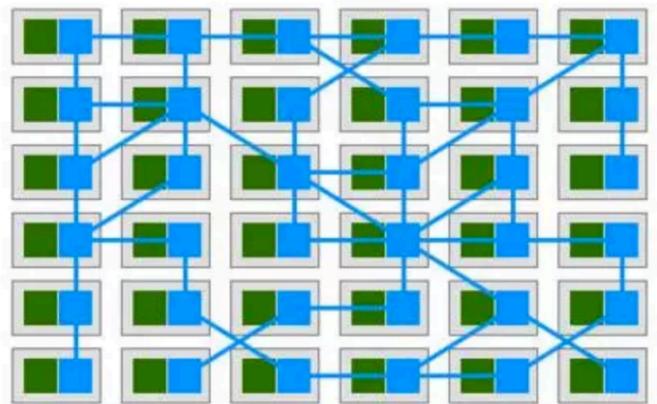

KubeCon

CloudNativeCon

Europe 2019

A service mesh provides a **transparent** and **language-independent** network for connecting, observing, securing and controlling the connectivity between services.

Istio

KubeCon

CloudNativeCon

Europe 2019

**An open service mesh platform
to connect, observe, secure,
and control microservices.**

Istio

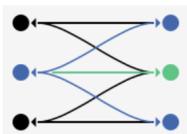

KubeCon

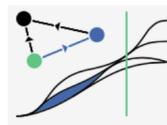

CloudNativeCon

Europe 2019

An open service mesh platform to connect, observe, secure, and control microservices.

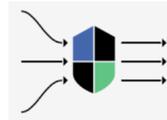

Connect: Traffic Control, Discovery, Load Balancing, Resiliency

Observe: Metrics, Logging, Tracing

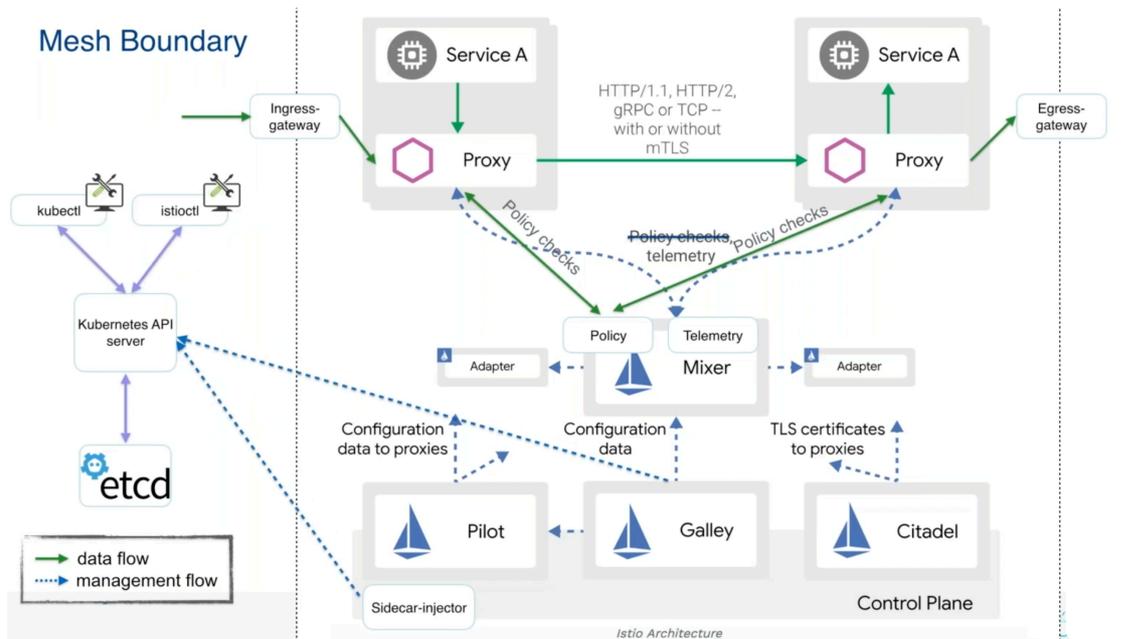

Secure: Encryption (TLS), Authentication, and Authorization of service-to-service communication

Control: Policy Enforcement

Istio architecture

Istio on Knative

Traffic Routing

Telemetry

Security

Istio

Knative

Kubernetes

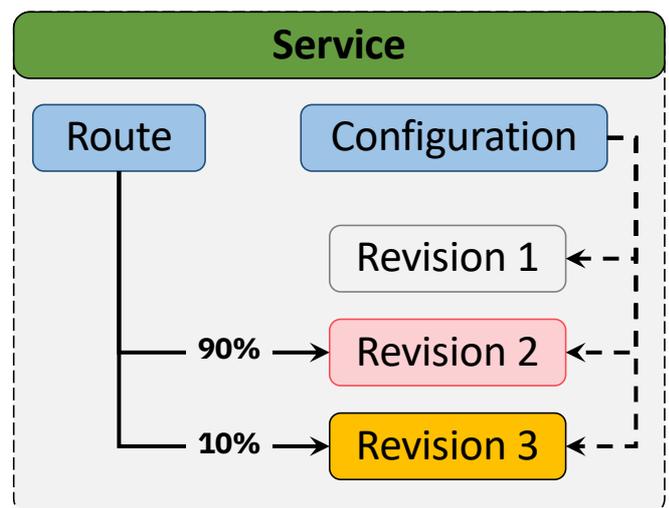

Knative basic concepts

CloudNativeCon
Europe 2019

Manages the hosting aspects of your app

- **Service** - manages the lifecycle of app
- **Configuration** - manage history of app
- **Revision** - A snapshot of your app
 - Config and image
- **Route** - Endpoint and network traffic management

Traffic routing (1)

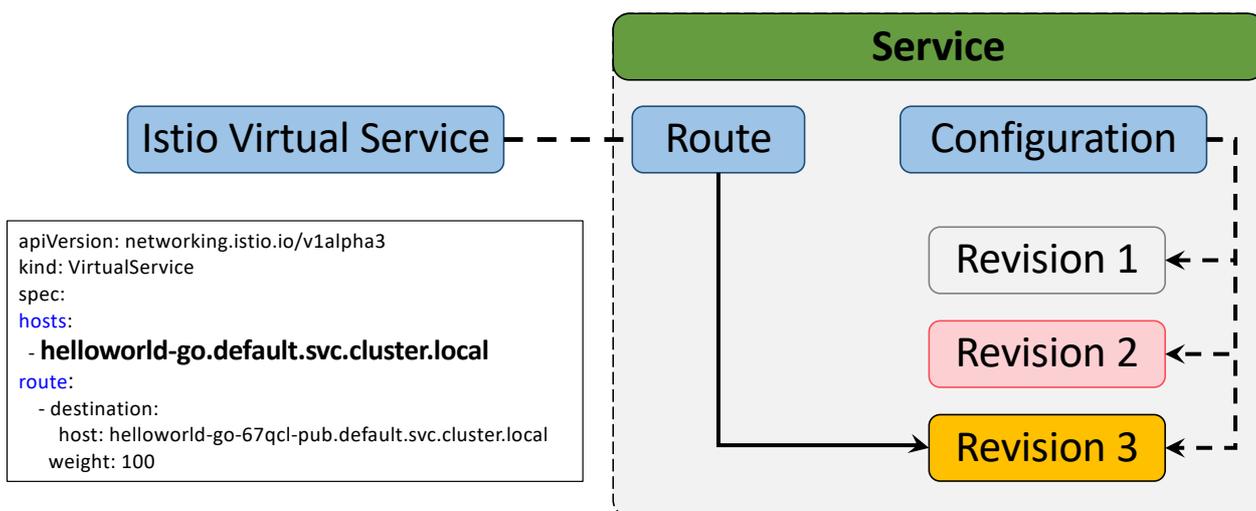

KubeCon

CloudNativeCon

Europe 2019

An **Istio Virtual Service** will be created for every **Route**

Traffic routing (2)

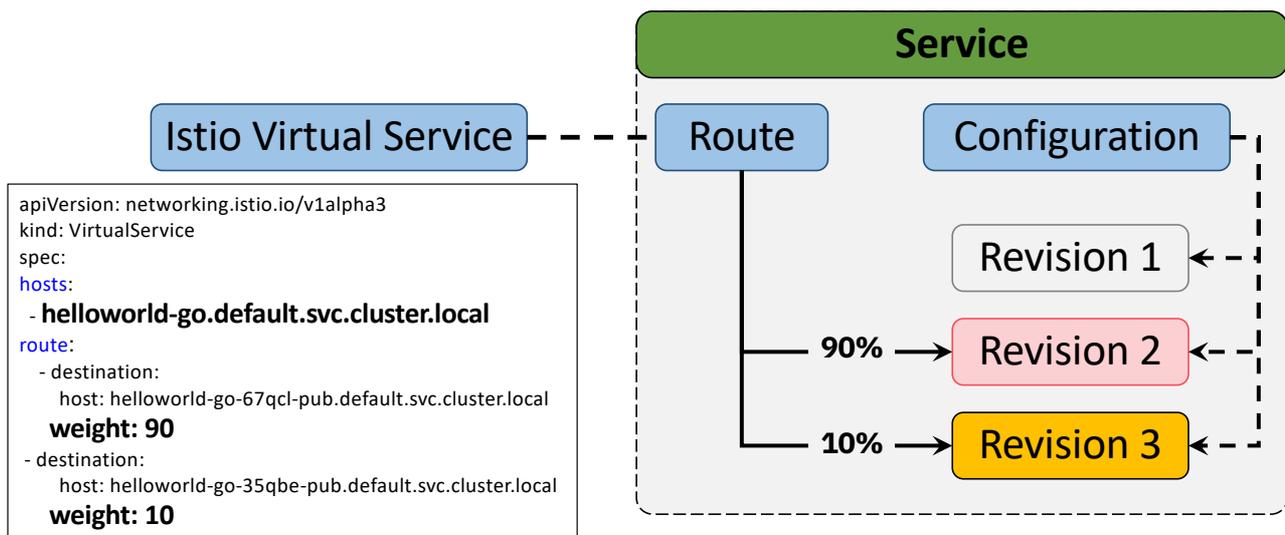

KubeCon

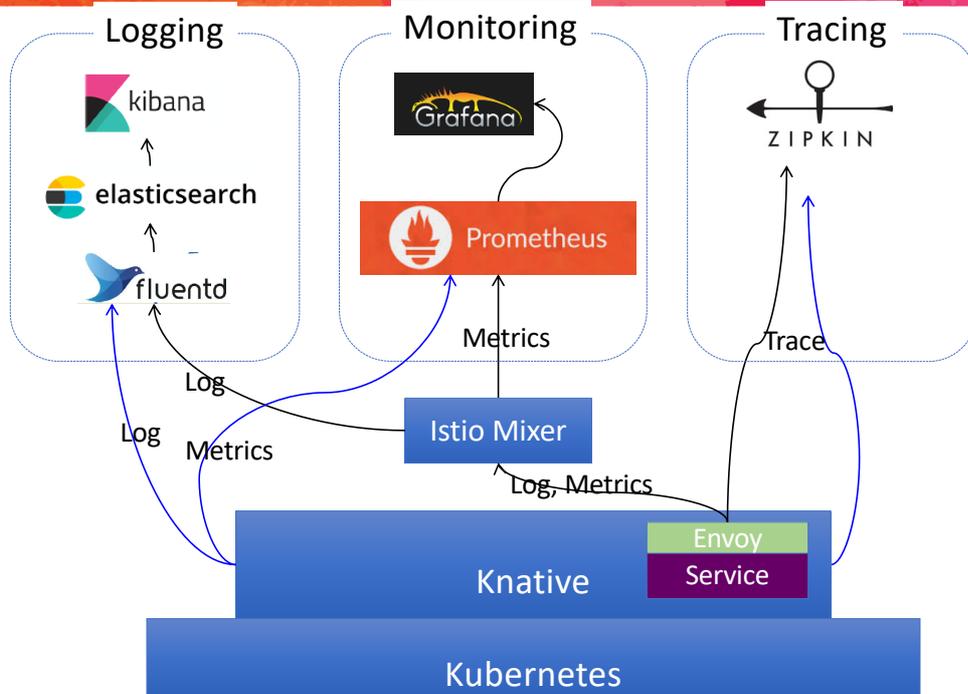

CloudNativeCon

Europe 2019

An Istio Virtual Service will be created for every Route

Telemetry

Security

KubeCon

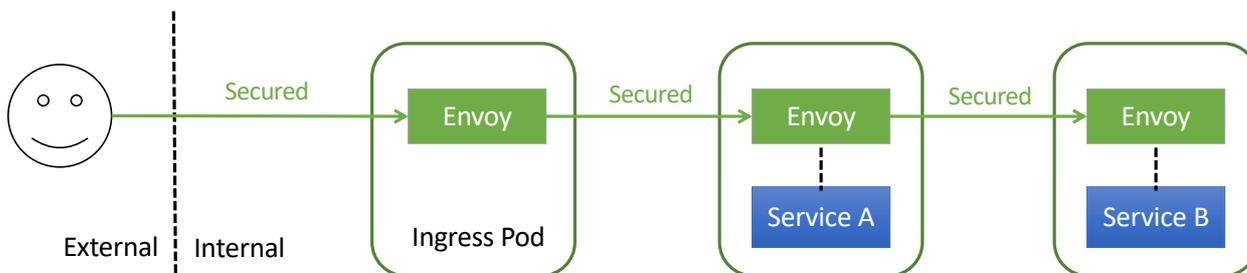

CloudNativeCon

Europe 2019

With side car injected :

- Can turn on mutual TLS, which secures service-to-service traffic within the cluster.
- Can turn on Gateway TLS with Secret Discovery Service (SDS)
- Can use the Istio authorization policy, controlling the access to each Knative service based on Istio service roles.

Benefits summary

KubeCon

CloudNativeCon

Europe 2019

- Istio taking care of Service Mesh
 - Traffic control
 - Secure services access
 - Telemetry
- It makes Knative **focus** on serverless

Benefits come at a price.....

KubeCon

CloudNativeCon

Europe 2019

Any costs?

Choices of Istio installation

KubeCon

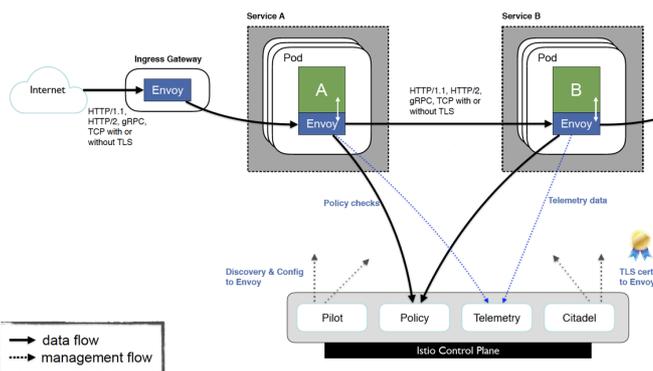

CloudNativeCon

Europe 2019

- Full Istio
- Full Istio with CNI plugin
- Full Istio without Policy
- Minimal Istio

Full Istio

• Full Istio with sidecar using init-container

7.316s : pod_creating
2.374s : container_startup_istio-initO
6.558s : container_startup_istio-proxy
6.611s : container_startup_queue-proxy
3.377s : container_startup_user-container

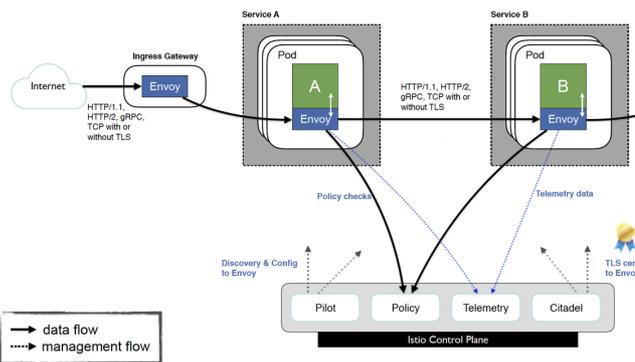

- ✓ Long cold start-up time
- ✓ Enjoy control and observability
- Additional latency for policy check

Services	1.280ms	2.561ms	3.841ms	5.122ms
istio-ingressgateway	-6.402ms : helloworld-go-67qcl-pub.default.svc.cluster.local:80/*	-	-	-
istio-ingressgateway	2.076ms : async outbound[9091]istio-policy.istio-system.svc.cluster.local egress	-	-	-
istio-mixer	-	330µs : /istio.mixer.v1.mixer/check	-	-
istio-mixer	-	12µs : kubernetes:kubernetesenv.istio-system(kubernetesenv)	-	-
helloworld-go-67qcl.de	-	3.373ms : helloworld-go-67qcl-pub.default.svc.cluster.local:80/*	-	-
helloworld-go-67qcl.de	-	1.743ms : async outbound[9091]istio-policy.istio-system.svc.cluster.local egress	-	-
istio-mixer	-	-	363µs : /istio.mixer.v1.mixer/check	-
istio-mixer	-	-	-	171µs : kubernetes:kubernetesenv.istio-system(kubernetesenv)

Full Istio with CNI plugin

• Full Istio with sidecar using CNI plugin

4.187s : pod_creating	.
3.524s : container_startup_istio-proxy	.
3.060s : container_startup_queue-proxy	.
2.016s : container_startup_user-container	.

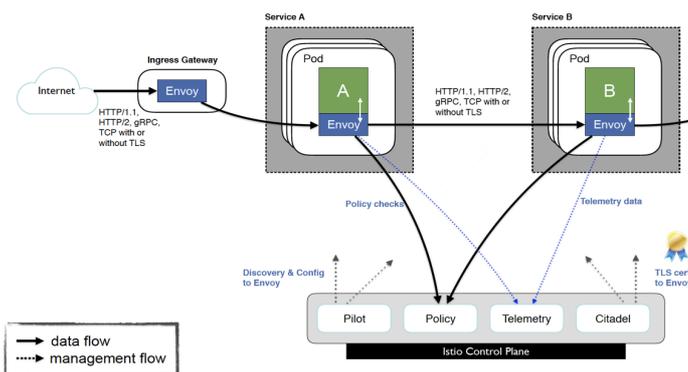

Long cold start-up time

- ✓ Enjoy control and observability
 - ✓ Remove security requirement for pod
- Additional latency for policy check

Services	2.414ms	4.828ms	7.242ms
istio-ingressgateway	12.070ms : helloworld-go-zq4rr-pub.default.svc.cluster.local:80/*	.	.
istio-ingressgateway	2.144ms : async outbound[9091] istio-policy.istio-system.svc.cluster.local egress	.	.
istio-mixer	290µs : /istio.mixer.v1.mixer/check	.	.
istio-mixer	01µs : kubernetes:kubernetesenv.istio-system(kubernetesenv)	.	.
helloworld-go-zq4rr.def	.	3.545ms : helloworld-go-zq4rr-pub.default.svc.cluster.local:80/*	.
helloworld-go-zq4rr.def	.	2.230ms : async outbound[9091] istio-policy.istio-system.svc.cluster.local egress	.
istio-mixer	.	314µs : /istio.mixer.v1.mixer/check	.
istio-mixer	.	06µs : kubernetes:kubernetesenv.istio-system(kubernetesenv)	.

Full Istio without policy

- Full Istio with sidecar using init-container
- Policy disabled

7.003s : endpoint_wait	.
6.830s : pod_creating	.
2.991s : container_startup_istio-init	.
6.097s : container_startup_istio-proxy	.
5.106s : container_startup_queue-proxy	.
3.936s : container_startup_user-container	.

Long cold start-up time

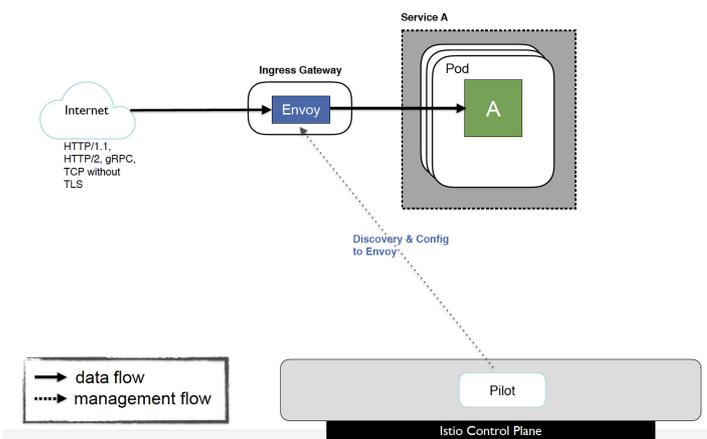

- ✓ Enjoy traffic control & observability
- ✓ No additional check Latency

Services	485µs	970µs
istio-ingressgateway	2.424ms : helloworld-go-67qcl-pub.default.svc.cluster.local:80/*	.
helloworld-go-67qcl.defa	.	1.369ms : helloworld-go-67qcl-pub.default.svc.cluster.local:80/*

Minimal Istio

• Minimal Istio without sidecar

1.611s : pod_creating	.
.	1.196s : container_startup_queue-proxy
.	1.133s : container_startup_user-container

- ✓ Short cold start-up time
- ✓ No control and observability
- ✓ No additional latency

Trade-off by yourself

KubeCon

CloudNativeCon

Europe 2019

Istio	Costs			Benefits			
	Long cold start up time	Additional latency in response time	NET_ADMIN capabilities	Traffic Routing	Policy Control	Security	Telemetry
Full Istio	●	●	●	●	●	●	●
Full Istio with CNI Plugin	●	●		●	●	●	●
Full Istio without policy	●		●	●		●	●
Minimal Istio without Sidecar				●			◐

Recap

KubeCon

CloudNativeCon

Europe 2019

- Istio is a good complement of Knative.
- Carefully selection of Istio
 - ✓ Manual sidecar injection.
 - ✓ Disable policy if possible.
 - ✓ Use CNI plugin if security restriction(Alpha).

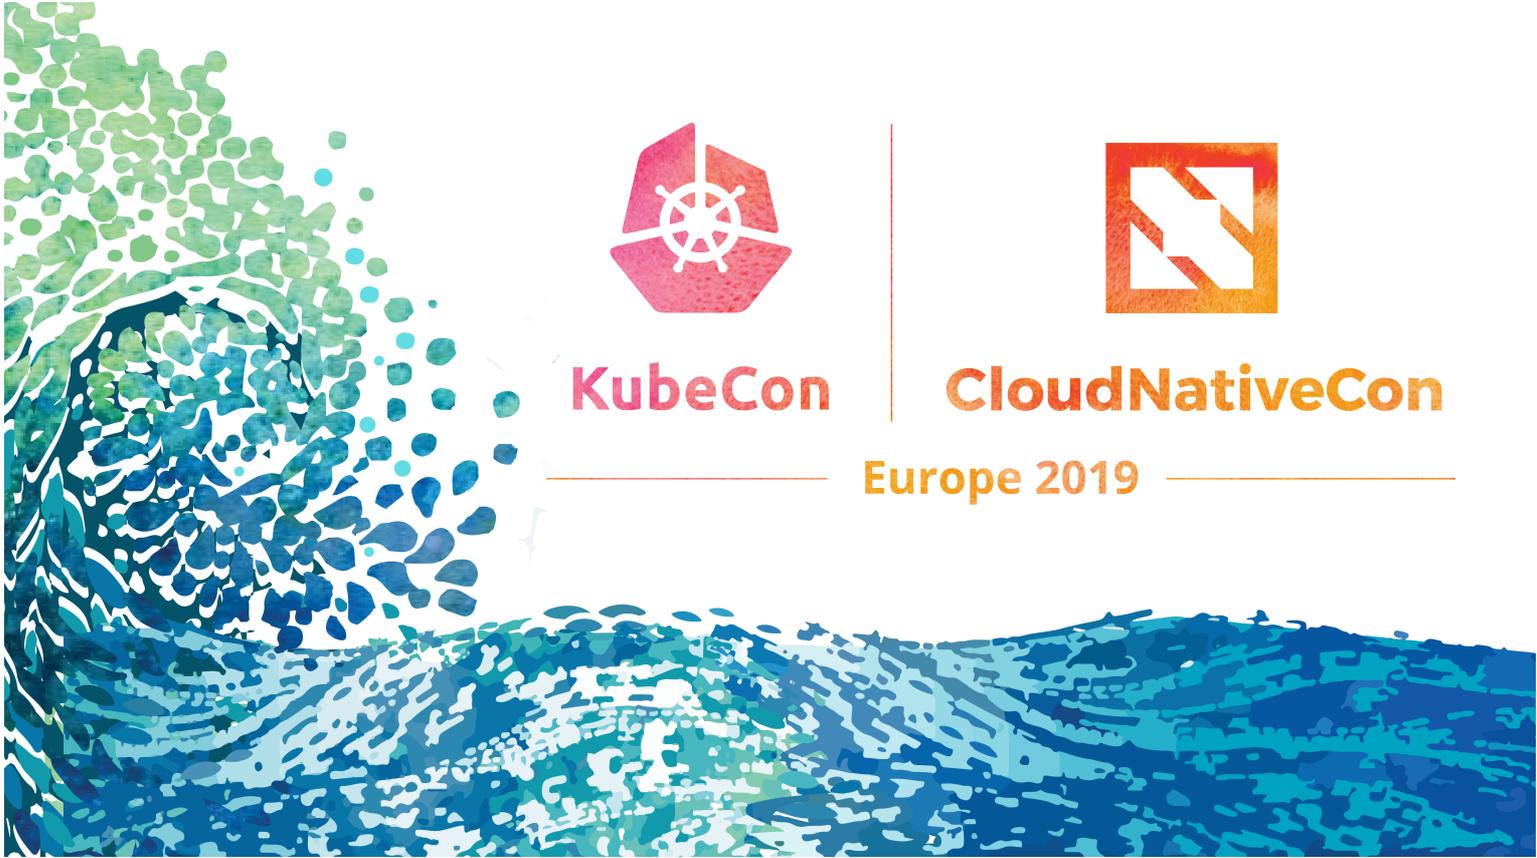

KubeCon
