Deep Dive: CNCF CI

Lucina Stricko & Denver Williams,
Vulk Coop & CNCF

Agenda:

KubeCon

CloudNativeCon

Europe 2019

- **Team**
- **Intro**
- **Key features**
- **Overview**
- **Deep Dive: Adding Arm Support**
 - **Demo**
 - **Code Review**
- **Get Involved**
- **Q&A**

Meet Vulk Cooperative

KubeCon

CloudNativeCon

Europe 2019

- Worker-owned software consultancy
- 4 worker-owners, 5-10 associates
- Geographically distributed team
- Celebrating 5 years in operation
- Hosts Austin Software Co-operatives monthly meetup in Austin, TX USA
- Learn more at vulk.coop
- Follow at twitter.com/vulkcoop

Meet the team:

KubeCon

CloudNativeCon

Europe 2019

- **W. Watson**
[@wavell](#)
- **Lucina Stricko**
[@lixuna](#)
- **Denver Williams**

CNCF CI Intro

KubeCon

CloudNativeCon

Europe 2019

The CNCF CI project consists of a CI testing system, status repository server and a dashboard -- cncf.ci.

CNCF CI Intro

KubeCon

CloudNativeCon

Europe 2019

The CNCF CI project consists of a **CI testing system**, status repository server and a dashboard -- `cncf.ci`.

The **CI testing system** validates the build and deployment of each CNCF project for any commit on stable and HEAD to x86 and Arm architectures on bare metal (Packet) servers.

The **CI testing system** can reuse existing artifacts from a project's preferred CI system or generate new build artifacts.

CNCF CI Intro

KubeCon

CloudNativeCon

Europe 2019

The CNCF CI project consists of a CI testing system, **status repository server** and a **dashboard** -- `cncf.ci`.

The CI testing system validates the build and deployment of each CNCF project for any commit on stable and HEAD to x86 and Arm architectures on bare metal (Packet) servers.

The CI testing system can reuse existing artifacts from a project's preferred CI system or generate new build artifacts.

The **status repository server** collects the test results and the **dashboard** displays them.

CNCF CI Intro

KubeCon

CloudNativeCon

Europe 2019

CNCF.CI Goals:

- To compliment the CNCF landscape and trail map -- l.cncf.io
- To promote CNCF hosted projects and help attract more projects to CNCF
- To demonstrate the use of cloud native technologies on multiple test environments
- To support and contribute to a sustainable and scalable project ecosystem
- To get feedback from cloud native end users and projects
- To provide a third party, unbiased validation of build, deploy and e2e tests for CNCF Graduated and Incubating projects

Goal: Target CNCF Projects

KubeCon

CloudNativeCon

Europe 2019

Graduated

kubernetes

Goal: Target ONAP SO Project

KubeCon

CloudNativeCon

Europe 2019

“...Our CNCF demo at ONS will illustrate to carriers that Kubernetes and ONAP are key to the future of network virtualization.”

- Dan Kohn, CNCF executive director

KubeCon

CloudNativeCon

Europe 2019

Key Features

Key Features: CNCF CI v2

KubeCon

CloudNativeCon

Europe 2019

1. Project-centric -- highlight and validate CNCF Hosted Graduated and Incubating projects:

- Validate stable and HEAD releases of Graduated and Incubating projects
- Re-use build containers that are provided by a project's CI System
- Re-use upstream Helm charts
- Re-use end-to-end tests provided by projects

Key Features: CNCF CI v2

KubeCon

CloudNativeCon

Europe 2019

2. Collaboration -- increase engagement with CNCF

Project maintainers:

- Maintainers can update project and release details via GitHub PR
- Cncf.ci will integrate with external CI systems to retrieve a CNCF Project's build status and container artifacts
- Maintainers can provide Helm charts and smoke tests for deploy phase
- Maintainers can provide end-to-end tests for test phase

Key Features: CNCF CI v2

KubeCon

CloudNativeCon

Europe 2019

3. Comprehensive testing -- validate projects in configurable Test Environments:

- Kubernetes Releases:
 - Stable
 - HEAD
- Architectures:
 - Arm
 - x86
- Bare Metal
 - Packet

CNCF CI Dashboard Overview

KubeCon

CloudNativeCon

Europe 2019

CI Dashboard Overview:

- Overview of cncf.ci
 - Refreshes daily at 3:00am Eastern Time
 - Provisions Test Environments for K8s release and architecture
 - Shows status of K8s Provisioning to Packet
 - Supports status of Build, App Deployments and e2e testing per project

Arm is a CNCF Gold Member

KubeCon

CloudNativeCon

Europe 2019

Cloud Native Computing Foundation Welcomes Arm as Gold Member

By [cncf](#) | February 19, 2019 | Announcement

Arm joins CNCF as Gold Member

KubeCon

CloudNativeCon

Europe 2019

“In joining CNCF, Arm plans to build on the significant work from the community to ensure that Kubernetes and other CNCF-hosted projects run well on Arm-based platforms.”

<https://www.cncf.io/announcement/2019/02/19/cncf-welcomes-arm-as-gold-member/>

Get Involved

How to Contribute

KubeCon

CloudNativeCon

Europe 2019

How to Add Arm Support to Projects on the CNCF CI Dashboard:

- Look at Gitlab CI system and use existing project builds as reference
- Ex. Add Arm support for Linkerd
 - <https://github.com/crosscloudci/linkerd-configuration/blob/master/.gitlab-ci.yml>

Connect with the Team

KubeCon
