```
1 function lambda(input, callback) {
2   let allSurveyEmails = [];
3   //csatRank value range: 1-5, 1=very dissatisfied, 5=very satisfied
4   let csatRank = input.payload.csatRank > -1 ? input.payload.csatRank : null;
5   let skillName = input.payload.skillName;
6   let agentName = input.payload.agentName;
7   let questionsAndAnswers = input.payload.questionsWithAnswers;
8   if (csatRank && csatRank <= 3 &&
9     input.payload.skillName.match(/CustomerCare/i) !== null &&
10    input.payload.agentName.match(/John Doe/i) !== null) {
11     let surveyEmail = {
12       targetEmail: 'ReplaceMe@company.com',
13       senderName: 'Sender X',
14       senderEmail: 'ReplaceMe@company.com',
15       subject: 'Email Transcript Notification',
16     };
17     surveyEmail.se
18     function()
19     allSurveyEmail
20   }
21   //Return result
22   callback(null, all
23 }
24 }
```

Inspector showing object structure:

- senderEmail (property) senderEmail: string
- senderName
- surveyEmail
- subject
- skillName
- allSurveyEmails
