Container-native Dev Experience

It’s getting better, *fast*.

Ralph Squillace
PM Azure Container Platform

"Developing Apps for Kubernetes is still way too hard."

"Hold my beer."

VS Code & OSS Tooling

INTRODUCING THE

OSS Container-Native Development Lifecycle

Start with Code

Don't need to *master* container tools and Kubernetes before you can build apps.

Work & Debug Normally

Remote or local cloud.

Automate your World

Script containers like you bash.

Kubernetes

handles the rest!

OSS Container-Native Moments

01	02	03	04	05
Get Started: Creating and deploying from scratch	**Custom Services:** Creating and deploying *yours*	**Inner Loop:** Development and Debugging	**Building Out:** Attaching to the world	**Outer Loop:** Push, Build Securely, Deploy, Automate
