

Europe 2018

SIG Testing Deep Dive

Cole Wagner (@cjwagner, Google)
Sen Lu (@krzyzacy, Google)

Agenda

- □ Prow Architecture (@krzyzacy)
- ☐ Tide, merge automation (@cjwagner)
- ☐ Test-infra Roadmap (@krzyzacy)
- **□** Q&A

Prow? Why Prow?

Europe 2018

Pain with Jenkins

Europe 2018

- Problem with Jenkins:
 - Stateful, restart Jenkins? Painful!
 - Github plugins are hard to use
 - Security issues
- Maintaining nightmare (ask @ixdy for one of his oncall days) on Jenkins VMs
 - Resource leaks
 - Offline agents
 - □ Running out of fds
 - Only some Jenkins experts (or nobody) knows how to debug

Source: https://thenib.com/this-is-not-fine

Prosper of Prow

- ☐ Started by Joe Finney (@spxtr) ~2016
- ☐ Fully replaced Jenkins by Jan 2018
- Test k8s on k8s!
 - Easy to maintain/deploy
 - Job config is basically a podspec
 - Respond to github webhooks, rather than a munger
- We know k8s better than Jenkins:)

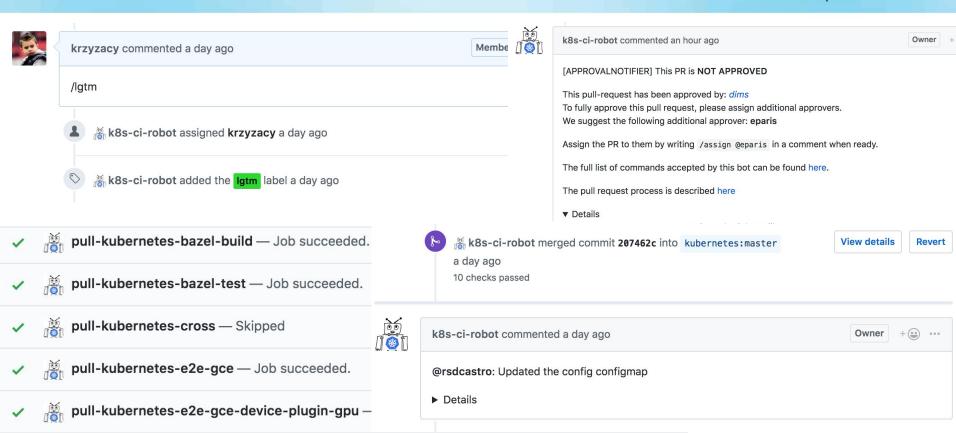

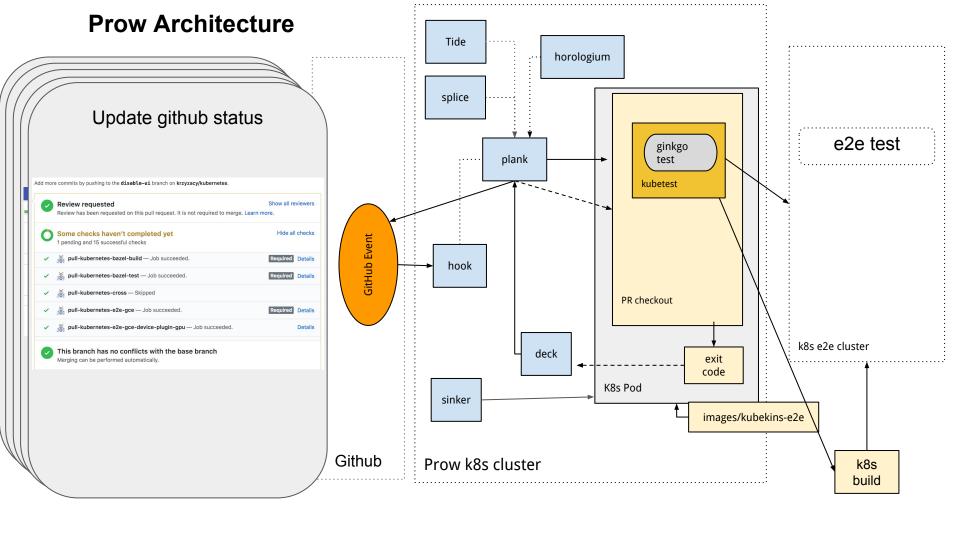

What does Prow do?

Europe 2018 -

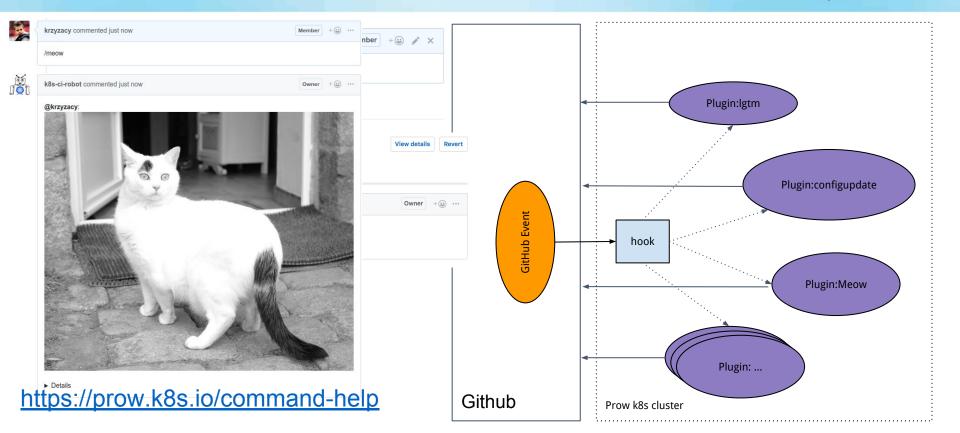

Prow Plugins

Prow Adoption

- 181 nodes, 1152 cores
- Scheduled 4.3 mil jobs last year
- 770 different jobs
- Set up presubmits for 31 repos

Deploy your Own prow

What you need:

- k8s cluster
- **github tokens**
- starter.yaml

Then:

github webhooks

Run the prow components in the cluster

Run the following command to start up a basic set of prow components.

kubectl apply -f cluster/starter.yaml

After a moment, the cluster components will be running.

\$ kubectl g	et deployme	ents			
NAME	DESIRED	CURRENT	UP-TO-DATE	AVAILABLE	AGE
deck	2	2	2	2	1 m
hook	2	2	2	2	1m
horologium	1	1	1	1	1 m
plank	1	1	1	1	1 m
sinker	1	1	1	1	1m

Next: Merge your PR

Automated PR Merging

Europe 2018

Goals:

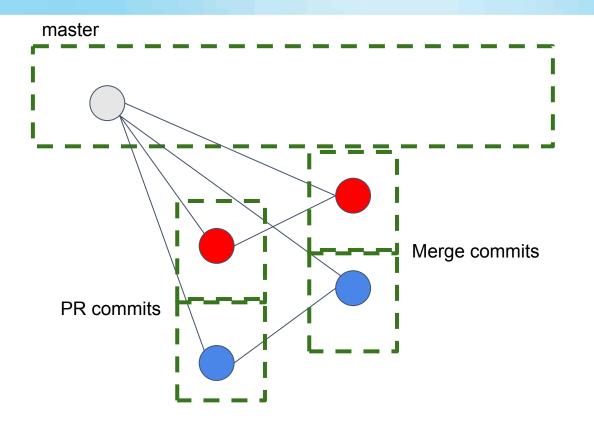

- Automatically merge PRs that meet specific requirements
 - Has label, does not have label, milestone, status contexts...
 - Allows restricting access to the merge button.
- Ensure that a PR is not merged until tested against most recent base branch commit.
- Scalable:
 - Needs to be able to process thousands of PRs.
 - Should be able to process many repos.

Testing Against HEAD

Batch Testing/Merging

Up to 50 PRs per day, testing takes ~45 mins =>

Only able to test ~35 PRs per day, wouldn't be able to clear the queue as fast as it grows.

Instead try to test and merge multiple PRs together.

Previous Solution: Submit Queue

Europe 2018

Kubernetes Submit Queue Status PRS QUEUE HISTORY INFO Pull Requests (1519) Enter username or PR number #33440: Don't commit generated (some) code PR is unable to be automatically merged. Needs rebase. May 2, 2018 10:02:00 AM (+50/-37473) #33573: AWS: network providers required to update NetworkUnavailable Required Github CI test is not green: pull-kubernetes-bazel-build May 2, 2018 10:02:01 AM (+14/-7) #38861: Add optional loading from a config.d directory to kubectl. PR is unable to be automatically merged. Needs rebase. May 2, 2018 10:02:06 AM (+140/-10) #40059; add kubectl set rbac-rule role/clusterrole PR is unable to be automatically merged. Needs rebase. May 2, 2018 10:02:10 AM (+1493/-1) #40211: genericapiserver: write negotiated Status on timeout PR is unable to be automatically merged. Needs rebase. May 2, 2018 10:02:12 AM (+122/-70) #40674: Use multihosts feature from client-go.

Submit Queue

- One binary+config per repo (single tenancy).
- Polls for all PRs and their related info then filters+sorts them.
- Complicated prioritization logic.
- Batch testing added as an afterthought.
- Always retests PRs before merge.

New Solution: Tide

- Uses Github search query to define all merge requirements
- Batch testing/merging as a cornerstone.
- A single instance operates on many Github orgs and repos.
 - Currently merging PRs in 45 repos!
 - All, but one Submit Queue instances have been replaced.
- Doesn't retest unnecessarily because it has access to Prow job data (namely what base branch commit the test ran against).

Tide Dashboard

Europe 2018

Tide Status

Tide Status

State	Batch	Passing	Pending	Missing

	MERGE: #2997 WAIT WAIT WAIT	MERGE: #2997 WAIT WAIT WAIT	MERGE: #2997 #3008 #2997 WAIT WAIT WAIT WAIT	MERGE: #2997 #3008 #2997 WAIT #549 WAIT #660 WAIT #5336 #4804 #45

PR Dashboard w/ Tide

Tide Status Context

Europe 2018

Details

✓ ide — In merge pool.

Details

- Dynamic batch sizing and concurrent batches.
- Make the required status context configurable instead of requiring overall status to be 'green".
- Improve how jobs with failing tests are displayed.

Test-infra Roadmap

Test-infra Roadmap

- Switch to Tide for kubernetes/kubernetes
 - Retire last submit-queue :-)
- Split up testing configurations for each org/sig
 - Each sig can own their prow jobs
- Policy for promote/demote merge blocking jobs
 - We have <u>metrics for presubmit flakiness</u> now!
- Conformance Drive
 - Run with sonobuey, kubetest & display in testgrid
- Prow Bundle
 - OSS Testgrid
 - Logging/artifacts view from Prow
 - Bundle Prow + Testgrid
