# Intro: SIG Cluster Lifecycle

# Agenda

KubeCon

CloudNativeCon

North America 2018

## An overview of SIG Cluster Lifecycle

- Who?
- What?
- Why?
- Where, When, and How?

Who?

# Who are we?

KubeCon

CloudNativeCon

North America 2018

**Timothy St. Clair**

SIG Cluster Lifecycle co-lead  
Steering Committee Member  
Staff Engineer @Heptio/VMWare  
@timothysc

**Robert Bailey**

SIG Cluster Lifecycle co-lead  
Founding member of GKE  
Staff Software Engineer @Google  
@roberthbailey

# Who are we?

KubeCon

CloudNativeCon

North America 2018

- 569 members on mailing list
- 20+ companies represented during SIG meetings (over the last 3 months)
- 5 continents with contributors
- 1214 contributors with 9438 "contributions" in the 1.12 to 1.13 release cycle
- 15 SIG sponsored subprojects

**What?**

# What is our mission?

KubeCon

CloudNativeCon

North America 2018

*SIG Cluster Lifecycle's objective is to simplify creation, configuration, upgrade, downgrade, and teardown of Kubernetes clusters and their components.*

<https://github.com/kubernetes/community/blob/master/sig-cluster-lifecycle/charter.md>

# What we think vs. really do?

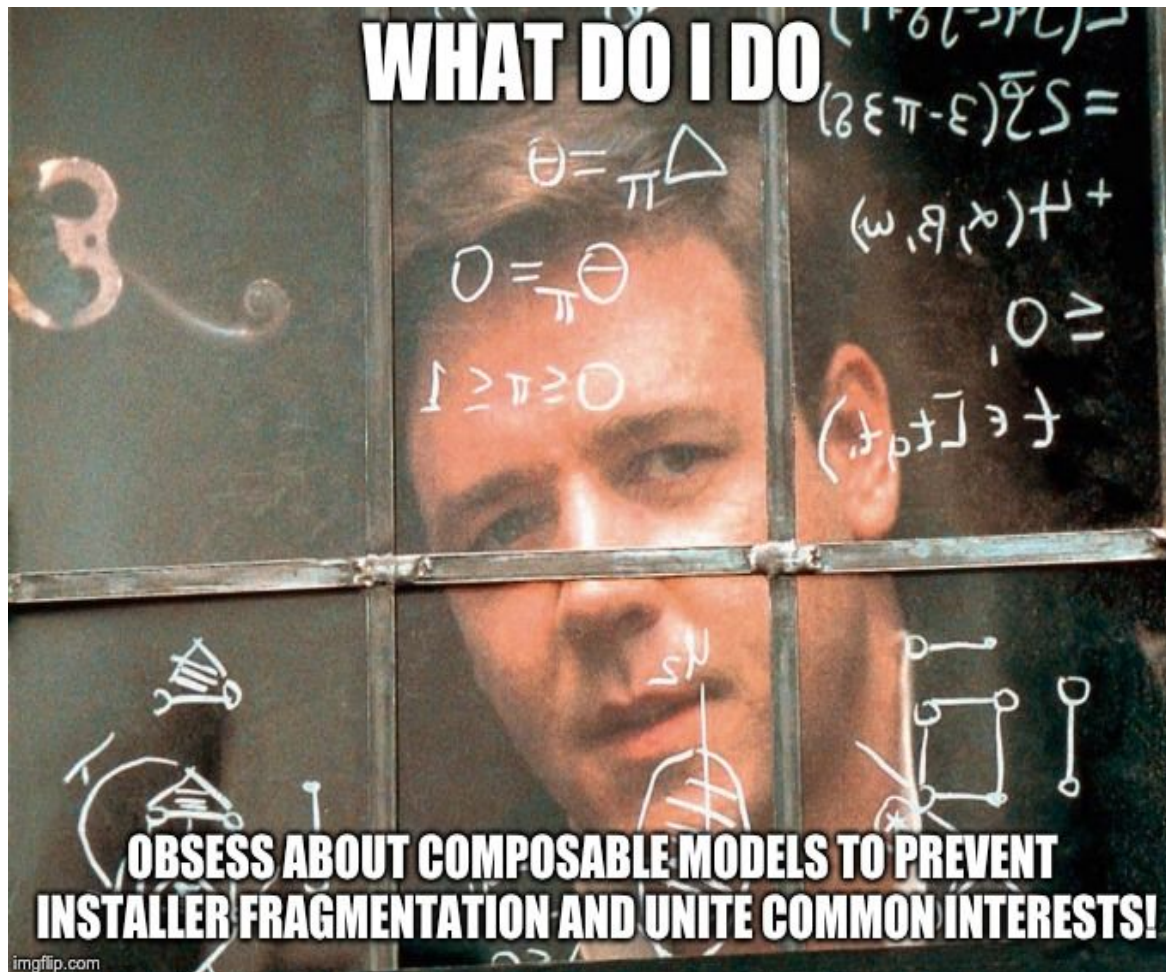

KubeCon

CloudNativeCon

North America 2018

# What do we *\*really\** do?

KubeCon

CloudNativeCon

North America 2018

## 1. Control Plane Installation Management

- *"How do I run the Kubernetes control plane?"*
- Building [kubeadm](#), cleaning up outdated getting started guides, and improving docs

## 2. Control Plane Configuration Management

- *"How do I configure the Kubernetes control plane?"*
- Driving a standard for configuring Kubernetes components ([KEP](#))

# What do we *\*really\** do?

KubeCon

CloudNativeCon

North America 2018

## 3. Simplifying Infrastructure Management

- *“How do I set up my network / machines?”*
- Working on a Machines API as part of the Cluster Management API ([KEP](#))

## 4. Addon Management

- *“How do I install things outside the core control plane?”*
- Many different approaches used today; still working on a plan for convergence
- Investigating usage of [Cluster Bundle](#)

# What do we *\*really\** do?

KubeCon

CloudNativeCon

North America 2018

## 5. Etcd Management

- *“How should we run etcd?”*
- Building etcdadm, a etcd management tool tailored to Kubernetes ([KEP](#))

# Kubeadm & ClusterAPI

# kubeadm (GA)

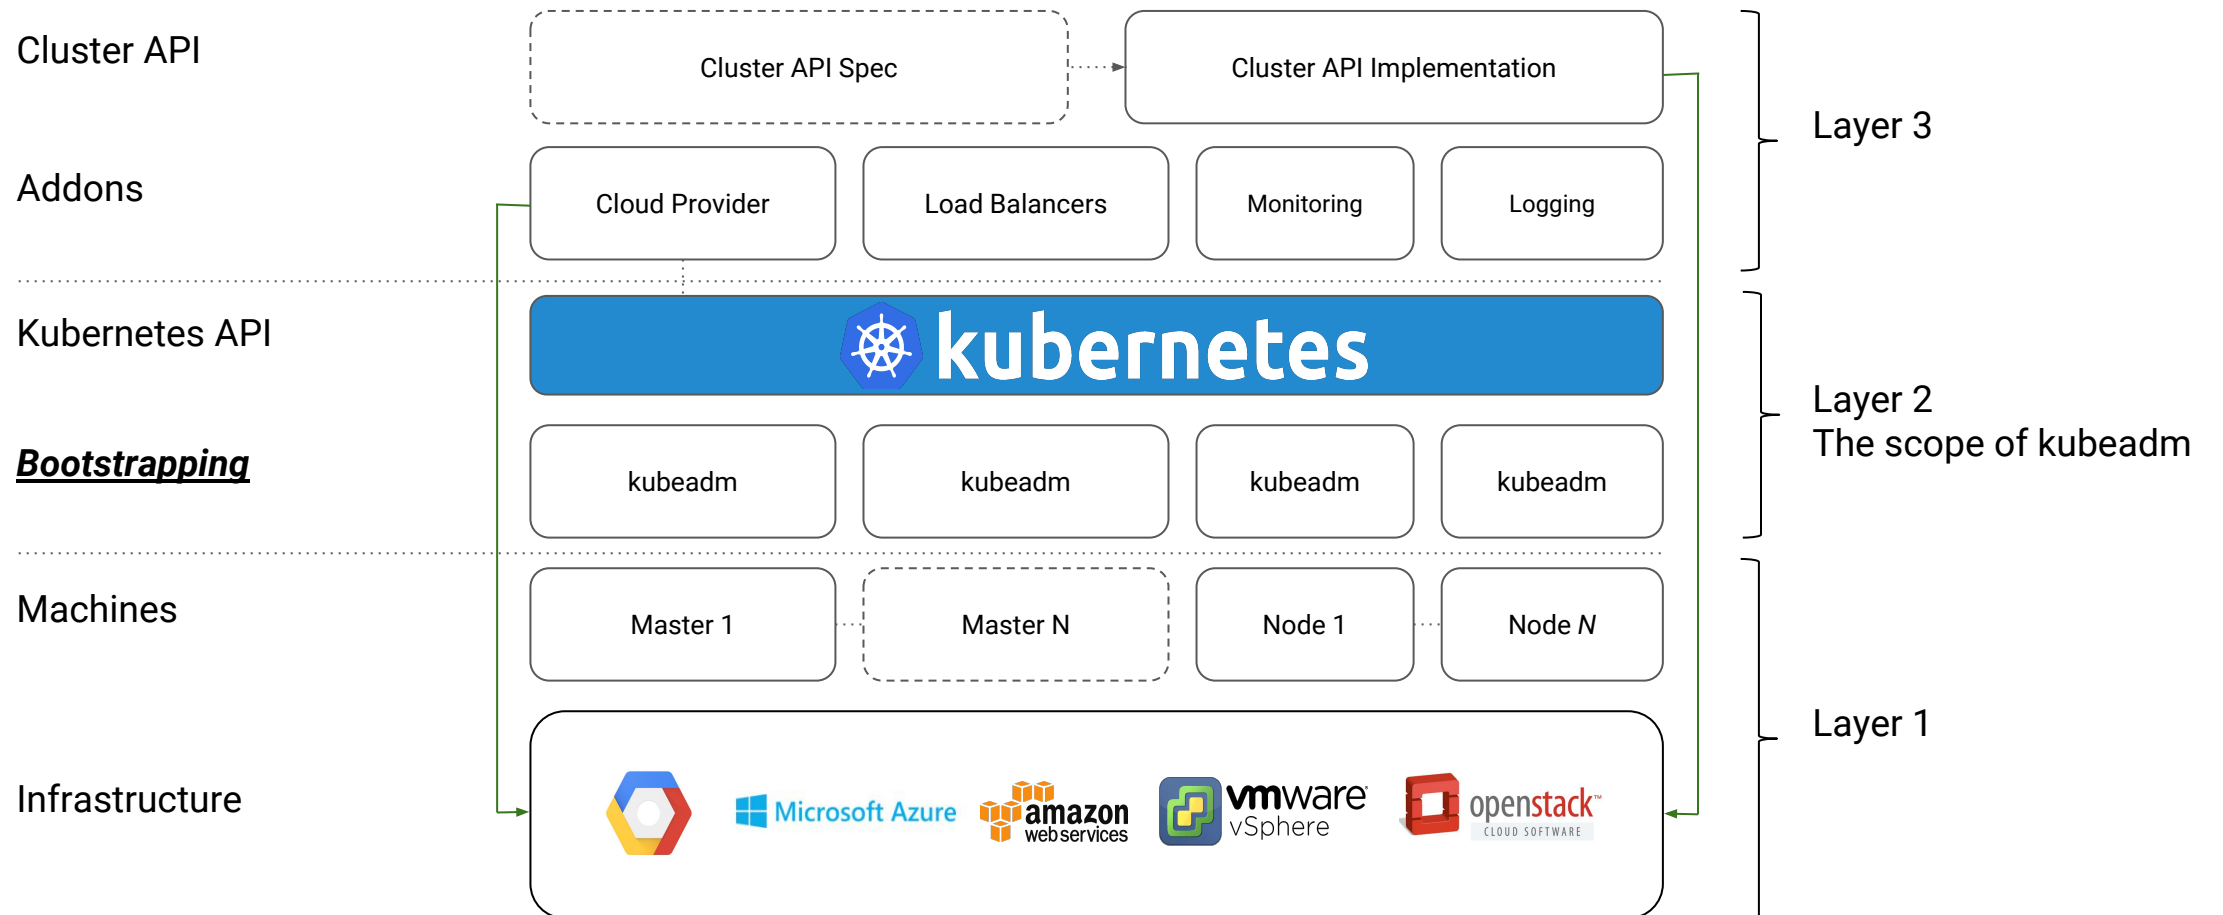

KubeCon

CloudNativeCon

North America 2018

= A tool that sets up a minimum viable, best-practice Kubernetes cluster

# kubeadm vs kops or kubespary

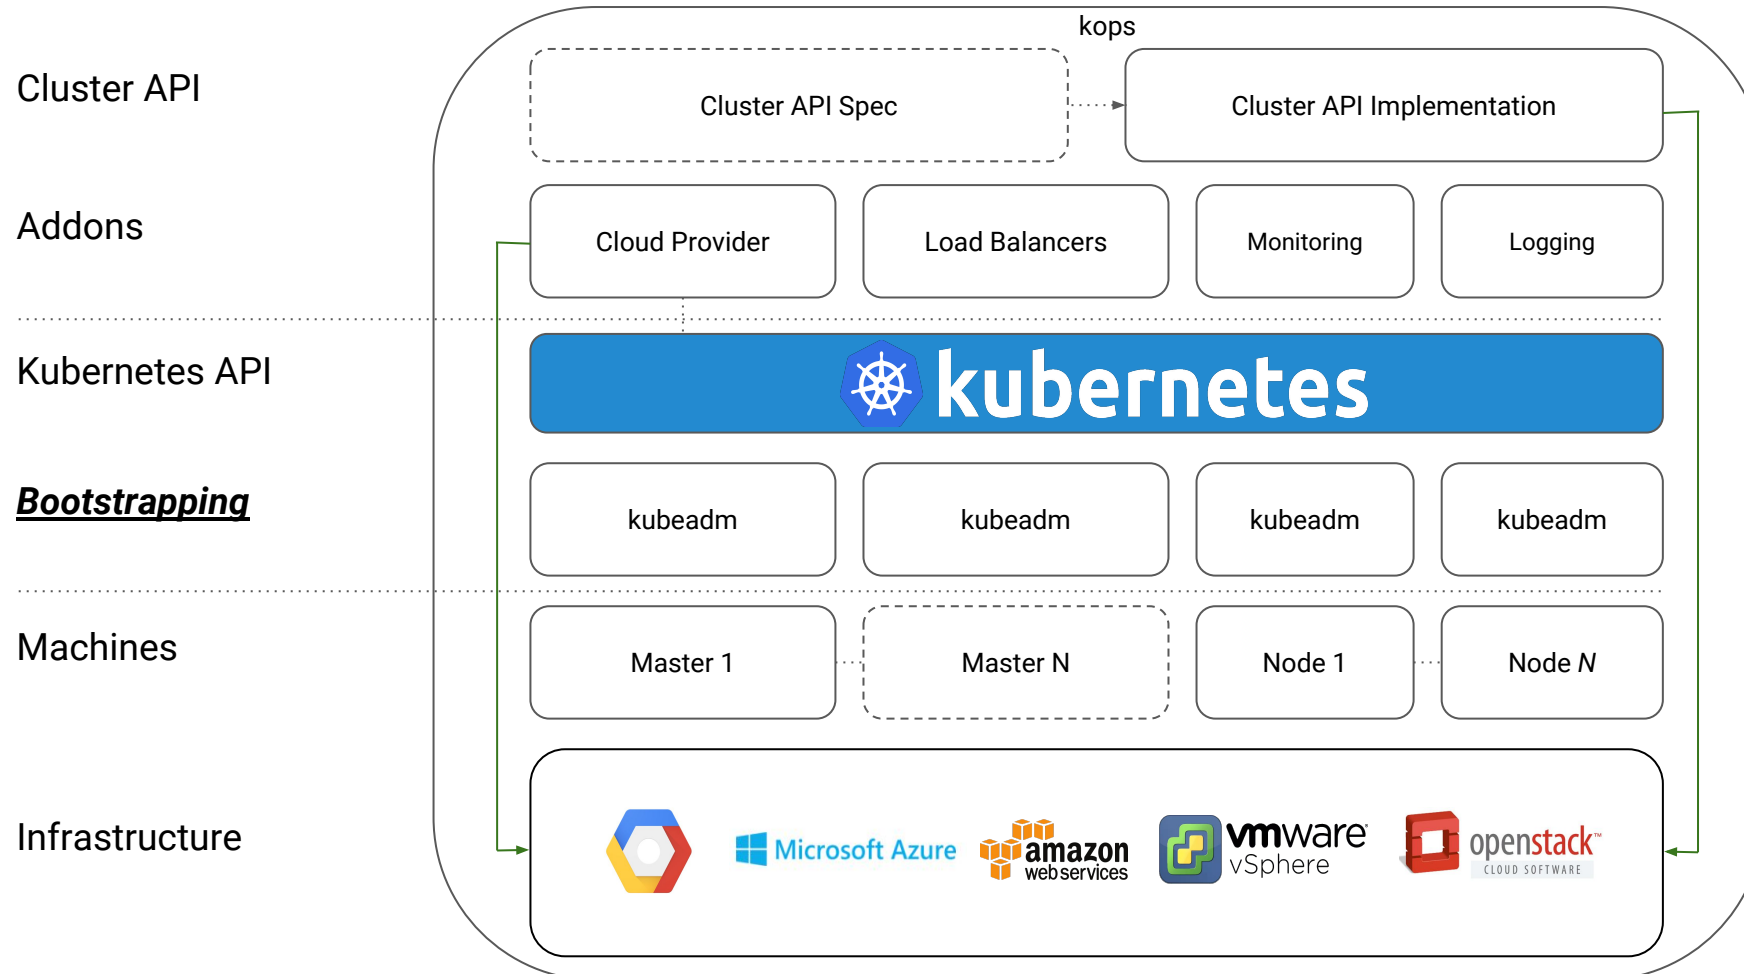

KubeCon

CloudNativeCon

North America 2018

## Two different projects, two different scopes

# Key Design Takeaways

KubeCon

CloudNativeCon

North America 2018

- kubeadm's task is to set up a **best-practice cluster** for each *minor version*
- The user experience should be *simple*, and the cluster reasonably *secure*
- kubeadm's scope is limited; intended to be a **composable building block**
  - Only ever deals with the local filesystem and the Kubernetes API
  - Agnostic to ***how exactly*** the kubelet is run
  - Setting up or favoring a specific CNI network is **out of scope**
- Composable architecture with everything divided into **phases**

# Cluster API

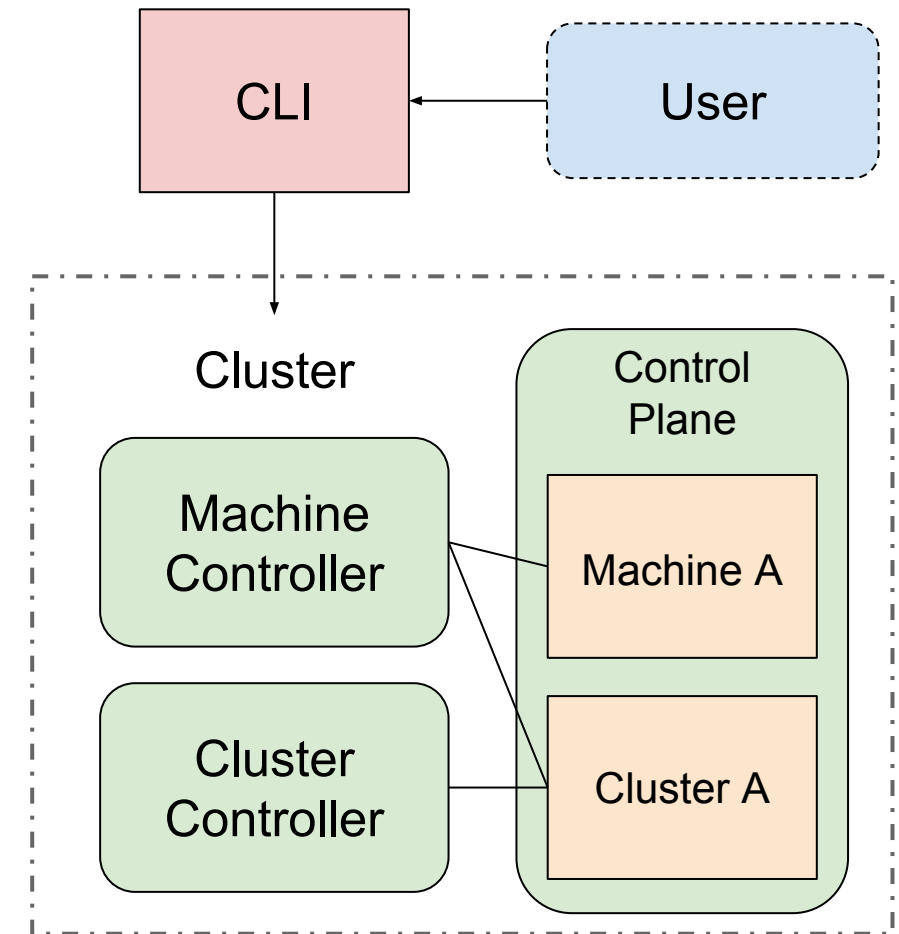

KubeCon

CloudNativeCon

North America 2018

- A declarative way to create, configure, and manage a cluster
  - apiVersion: "cluster.k8s.io/v1alpha1"
  - kind: Cluster, Machine, MachineSet, MachineDeployment
- Cluster
  - General cluster configuration (e.g. networking)
- Machine
  - A physical or virtual machine running a kubelet
- MachineSet / MachineDeployment
  - Groups of similarly configured machines

# Cluster API (cont)

KubeCon

CloudNativeCon

North America 2018

- Controllers reconcile desired vs. actual state
  - These could run inside or outside the cluster
- Cloud Providers will implement support for their IaaS
  - [AWS](#), [AWS/OpenShift](#), [Azure](#), [Baidu](#), [DigitalOcean](#), [GCE](#), [OpenStack](#), [Tencent](#), [vSphere](#)
  - Up-to-date list of providers can be found on Cluster API project [homepage](#)
- Port existing tools to target Cluster API
  - Cluster upgrades, auto repair, cluster autoscaler

**Why?**

# <BRACE FOR RANT>

KubeCon

CloudNativeCon

North America 2018

# Why are we doing this?

KubeCon

CloudNativeCon

North America 2018

- To prevent the mistakes of other open source clustering tools
  - Because...
    - kubernetes is the beginning of the story, not the end
    - commoditizing the deployment of the core raises all boats and allows the community to focus on solving end user problems
    - “production grade” shouldn’t be firewalled by providers
    - It should “just work”
    - Because cross provider matters
- To make the management of (X) clusters across (Y) providers simple, secure, and configurable.
- unix philosophy 4 lyfe

# Deets: Where & When & How?

# Getting Involved

KubeCon

CloudNativeCon

North America 2018

- [Contributing to SIG Cluster Lifecycle documentation](#)
- We're working on growing the contributor/reviewers pool; scaling the SIG
- We have “Office Hours” for our projects: weekly for kubeadm, bi-weekly for kops and kubespray...
- Cluster API office hours weekly for both US West Coast and EMEA
- Full list of SIG meetings and links to minutes and recordings can be found on [SIG page](#)
- Attend our meetings / be around on Slack
- Look for “**good first issue**”, “**help wanted**” and “**sig/cluster-lifecycle**” labeled issues in our repositories

# Other Logistics

KubeCon

CloudNativeCon

North America 2018

- Follow the [SIG Cluster Lifecycle YouTube playlist](#)
- Check out the [meeting notes](#) for our bi-weekly SIG meetings
- Join [#sig-cluster-lifecycle](#), [#kubeadm](#), [#cluster-api](#), [#kops-dev](#), [#kops-users](#), [#kubespray](#), [#minikube](#), ...
- Prep for and take the [Certified Kubernetes Administrator](#) exam
- Check out the [kubeadm setup guide](#), [reference doc](#) and [design doc](#)
- Read how you can [get involved](#) and improve kubeadm!

# What's coming in 2019?

KubeCon

CloudNativeCon

North America 2018

- Addon Management
- Etcdadm
- Mo' Better Dev-Test w/Kind
- Kubeadm
  - HA to GA
- Grand unified field theory on ComponentConfigs
- ClusterAPI
  - alpha + beta
  - More Providers
- Kubespray & Kops
  - Integration with the other building blocks

# BUT WAIT THERE'S MORE!!!

KubeCon

CloudNativeCon

North America 2018

- **Come see other SIG related talks this week**
  - Tuesday
    - Cluster API On-Prem & Cloud @3:40
  - Wednesday
    - Intro to Minikube @10:50
    - Deep Dive Kubespray @11:40
  - Thursday
    - Deep Dive Kubeadm @1:45
    - Deep Dive ClusterAPI @2:35
    - Managing Addons with Operators @4:30
