Is Service Mesh Ready for Edge-Native Applications?

Parveen Patel - Google
Ramki Krishnan - VMware
Ravi Chunduru - Verizon
Srini Addepalli - Intel
Wendy Cartee - VMware

App Transformation -> Centralized to Distributed

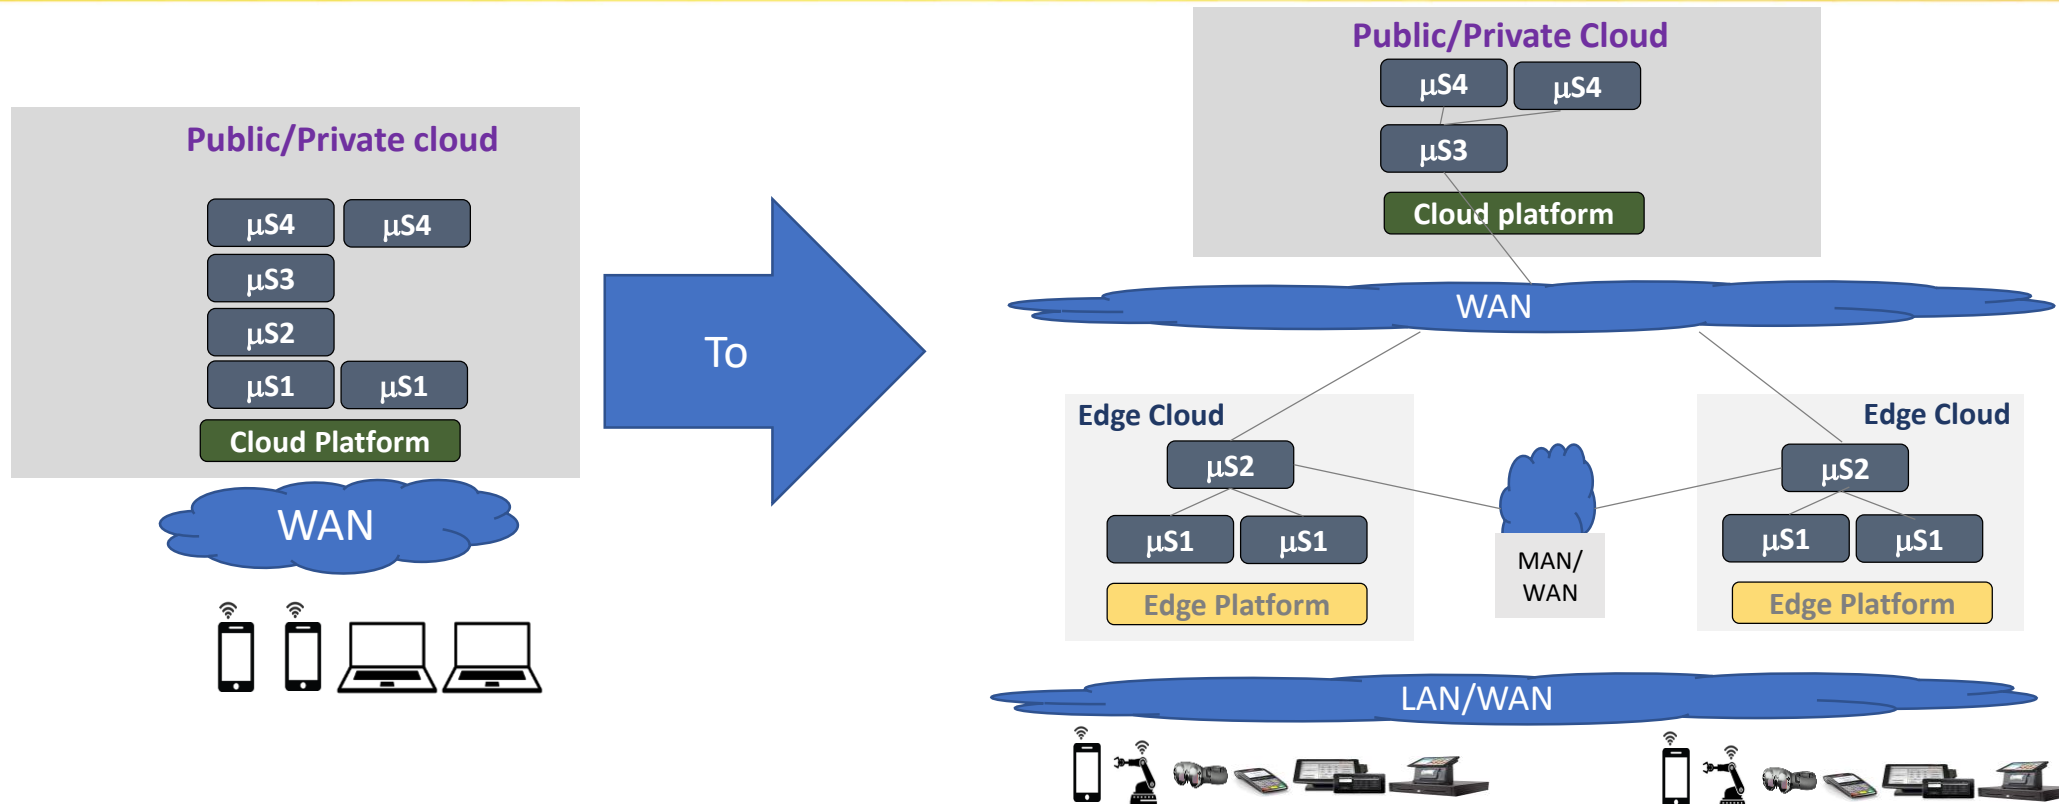

KubeCon

CloudNativeCon

North America 2019

Key Drivers towards App Transformation

- **Proximity** – close to user for low latency etc.
- **Data sovereignty** – government regulations etc.
- **Cost** – WAN bandwidth cost etc.
- **Context** – location info etc.

Service Mesh (SM) for Distributed Apps

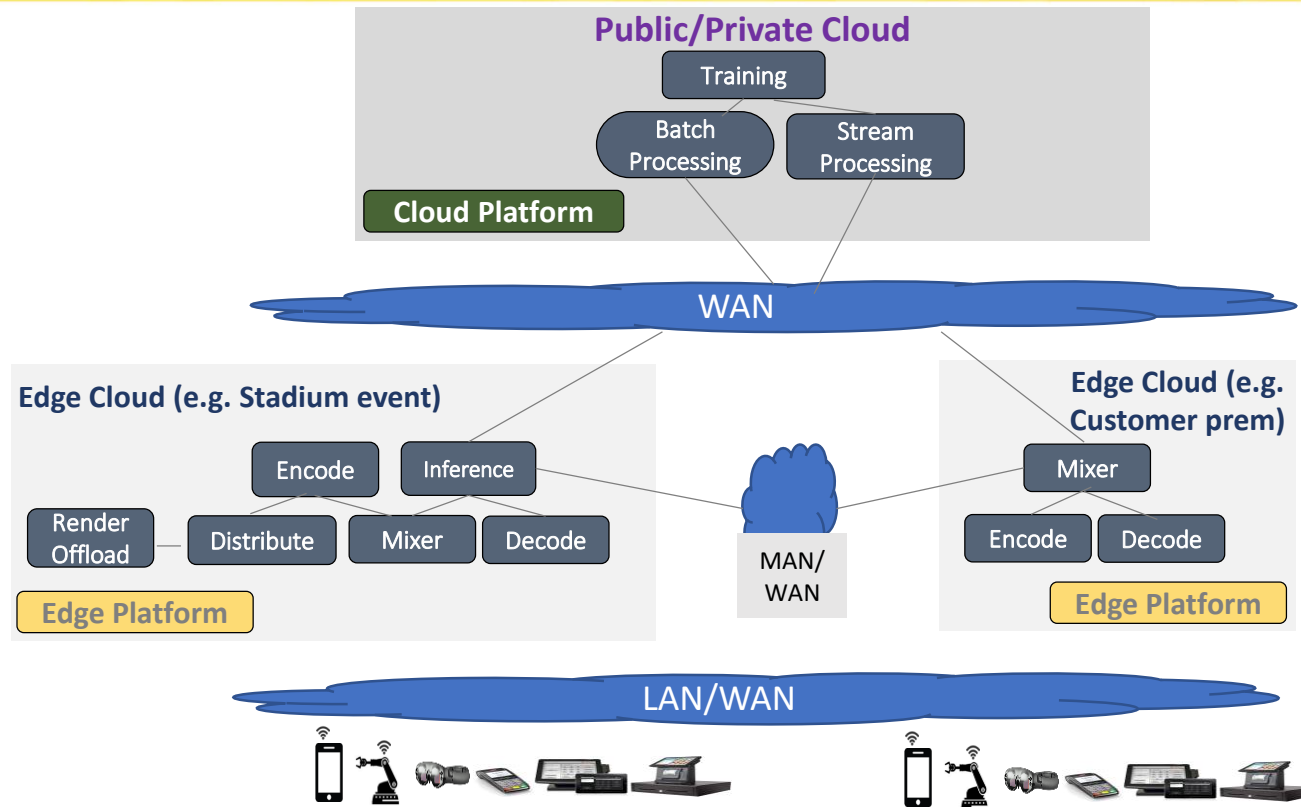

KubeCon

CloudNativeCon

North America 2019

Cloud AR/VR Distributed App Example

- Near-real-time processing, e.g. machine learning, in Public/Private Cloud

Cloud AR/VR Distributed App Example

- Real-time processing, e.g. mixing/inferencing, in Edge Cloud

Panel Focus

- Discuss key SM use cases for distributed apps
- Discuss key SM challenges for distributed apps
- Solution direction for key performance/isolation/resource management challenges
