Scaling Telepresence Across Your Organization

DATAWIRE

“Not so long ago…”

“What happens if I…”

Problem

The developer loop

“Why didn't that work?”

Problem

Software is opaque

Telepresence

The **Swap Deployment** Workflow

Telepresence **Swap Deployment**
does a good job for
one developer who owns a cluster

Telepresence **Swap Deployment**
does **a good job** for
one developer who owns a cluster

Telepresence **Swap Deployment**
does a good job for
one developer who owns a cluster

Telepresence **Swap Deployment**
does a good job for
one developer **who owns a cluster**

Debug this!

Debug this!

“I’ll just grab staging…”

Debug this!

“Let me spin up the app…”

Debug this!

“I can *make this work* in staging…”

Problem

Shared cluster

Just *my* requests?

Restrictions and Requirements

Restriction
